

# Oilseeds: World Markets and Trade

## Brazil Soybean Exports Up on Record Early-Season Shipments

Brazil Soybean October-November Exports

Source: Trade Data Monitor, LLC

The Brazil 2023/24 (October-September) export forecast is boosted 2.0 million tons to 99.5 million and reflects a similar change in the local year forecast (2022/23 February-January). Both changes come on the heels of record October-November shipments, combined at 10.7 million tons. The record volumes reflect abundant carryin supplies from the previous record soybean crop and continued competitive export prices. As a result, Brazil is cutting into the traditional U.S. export season. Facing stiff competition from Brazil, U.S. export commitments remain sparse, even with support from China purchases prior to the Asia-Pacific Economic Cooperation leaders’ summit in November 2023.

Most recent Brazil shipments look similar to 2018 and 2019, which were also significantly above the historical averages for the first 2 months of the marketing year. The high volume shipped in 2018 came during a period when U.S. producers faced retaliatory tariffs from China and Argentina supplies were tight. Strong Brazil shipments in 2019 reflected abundant supplies and competitive pricing despite a rebound in U.S. sales to China and higher volumes being shipped from Argentina. Many factors are at play in late 2023, primarily abundant Brazil supplies coupled with the tail end of the severe drought in Argentina. As a result, U.S. exporters faced increased export competition, especially in China.

Following strong Brazil exports, China imports are raised by 2.0 million tons to a new record of 102.0 million. Based on major exporters’ shipping data for September-November, China arrivals during the first quarter of 2023/24 could be 15 percent larger than last year.

## Rapeseed Exports Drop on Higher Crush and Lower Production in 2023/24

After reaching record levels in 2022/23, global rapeseed exports are forecast to slump almost 3.1 million tons in 2023/24 compared to last year's record of 20.2 million tons. This decline is largely due to reduced Australia production prospects.

Canada, the world's second largest producer and largest exporter of rapeseed, is expected to ship slightly less rapeseed in 2023/24 than the year prior despite higher forecast production. Increasing rapeseed oil exports to the United States has driven Canada crush higher in recent years, with a near record amount of crush expected in 2023/24.

Source: International Grains Council

Australia is coming off of a record year for rapeseed production and exports in 2022/23, with a steep decline of 2.3 million tons expected in 2023/24. The high prices from the disastrous 2021/22 Canadian crop spurred production expansion in Australia in 2022/23. With a

rebound in Canada in both 2022/23 and 2023/24 and global rapeseed prices falling, farmers in Australia lost incentive to continue rapeseed area expansion. Conversely, rapeseed prices in Ukraine present a more favorable option to farmers, leading to a record crop expected in 2023/24. However, expected increased crush of rapeseed in Ukraine compared to last year will result in exports remaining at similar levels to 2022/23, mitigating impacts on other exporters.

## OVERVIEW FOR 2023/24

The global oilseeds production forecast is lowered slightly this month to 661 million tons on large reductions in the Brazil soybean crop, more than offsetting higher Australia and Canada rapeseed crops. Global oilseed trade is up 2 million tons on higher Brazil soybeans and rapeseed in Canada and Australia. Ending stocks are up slightly as higher rapeseed carryout outweighs reductions in soybean and sunflowerseed ending stocks. Oilseed crush is up slightly on higher rapeseed crush in Canada and Ukraine, with global meal production also raised. Global protein meal exports are increased slightly on higher Canada and Ukraine rapeseed meal exports. Vegetable oil trade is unchanged with larger rapeseed oil exports offset by reduced palm oil trade.

The projected U.S. season-average farm price for soybeans is unchanged at \$12.90 per bushel.

## EXPORT PRICES

Soybean and soybean meal export prices were down, while vegetable oil prices increased since the November WASDE. Recently, price volatility has expanded in the soybean complex driven by weather concerns and crop prospects in South America, large China purchases of both Brazil and U.S. soybeans, and stronger-than-expected exports from other suppliers such as Paraguay, Canada, and Ukraine. Global demand has been strong, but the abundance of supplies in Brazil pressured soybean and meal prices lower in recent weeks.

Mid-November saw soybean meal prices from all origins skyrocket following strength in soybeans as well as plummeting Argentina crushing on slow farmer selling and a steep decline in soybean meal exports. However, soybean meal prices have fallen over \$80/ton since the mid-November peak on continued strong crush in Brazil and the United States. Argentine prices also dropped compounded by uncertainty over potential devaluation of the Argentine peso following inauguration of the new president.

Vegetable oil prices traded largely flat over the past month. Soybean oil prices remain elevated on limited crush and soybean supplies in Argentina and drought concerns in Brazil. In addition, soybean oil supplies are tight from other traditional suppliers such as the United States where domestic demand for soybean oil use in biofuels is high. Palm oil prices were slightly higher on seasonal supply declines and continuing uncertainty due to El Niño conditions.

# **ENDNOTES**

## **REGION DEFINITIONS**

North America: Canada, Mexico, the United States

Central America: Belize, Costa Rica, El Salvador, Guatemala, Honduras, Nicaragua, Panama

Caribbean: Cuba, Dominican Republic, Haiti, Jamaica, Trinidad and Tobago

South America: Argentina, Bolivia, Brazil, Chile, Colombia, Ecuador, Guyana, Paraguay, Peru, Suriname, Uruguay, Venezuela

EU: Austria, Belgium/Luxembourg, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Ireland, Italy, Latvia, Lithuania, Malta, Netherlands, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, and Sweden. Effective January 1, 2021, the separation of the United Kingdom (UK) from the European Union (EU) was complete, including trade between both entities. Starting in May 2021 with the release of 2021/22 data, grain PSDs reflect EU27 (shown in the PSD system as “European Union”) and UK separately. Beginning with the release of 2021/22 data, historical data for both EU27 and the UK are provided for 5 years (2016/17 through 2020/21).

Other Europe: Albania, Bosnia and Herzegovina, Former Yugoslavia, Gibraltar, Iceland, North Macedonia, Montenegro, Norway, Serbia, Switzerland, United Kingdom

Former Soviet Union: Armenia, Azerbaijan, Belarus, Georgia, Kazakhstan, Kyrgyzstan, Moldova, Russia, Tajikistan, Turkmenistan, Ukraine, Uzbekistan

Middle East: Afghanistan, Bahrain, Iran, Iraq, Israel, Jordan, Kuwait, Lebanon, Oman, Qatar, Saudi Arabia, Syria, Turkey, United Arab Emirates, and Yemen

North Africa: Algeria, Egypt, Libya, Morocco, Tunisia

Sub-Saharan Africa: all African countries except North Africa

East Asia: China, Hong Kong, Japan, South Korea, North Korea, Macau, Mongolia, Taiwan

South Asia: Bangladesh, Bhutan, India, Nepal, Pakistan, Sri Lanka

Southeast Asia: Brunei, Burma, Cambodia, Indonesia, Laos, Malaysia, Philippines, Singapore, Thailand, Vietnam

Oceania: Australia, Fiji, New Zealand, Papua New Guinea

## OTHER NOTES

**Marketing Years (MY):** MY refers to the 12-month period at the onset of the main harvest, when the crop is marketed (i.e., consumed, traded, or stored). The year first listed begins a country's MY for that commodity (2022/23 starts in 2022); except for oilseeds in certain Southern Hemisphere countries, where the second year begins the MY (2022/23 starts in 2023). For a complete list of local marketing years, please see the FAS website (<https://apps.fas.usda.gov/psdonline/>): go to Reports, Reference Data, and then Data Availability.

**Stocks:** Unless otherwise stated, stock data are based on an aggregate of differing local marketing years and should not be construed as representing world stock levels at a fixed point in time.

**Consumption:** World totals for consumption reflect total utilization, including food, seed, industrial, feed, and waste; as well as differences in local marketing year imports and local marketing year exports. Consumption statistics for regions and individual countries, however, reflect food, seed, industrial, feed, and waste only.

**Trade:** All PSD tables are balanced on the different local marketing years.
