

Oilseeds: World Markets and Trade

Lower Sunflower Seed Production in Ukraine and Russia Tightens Global Oilseed Supplies

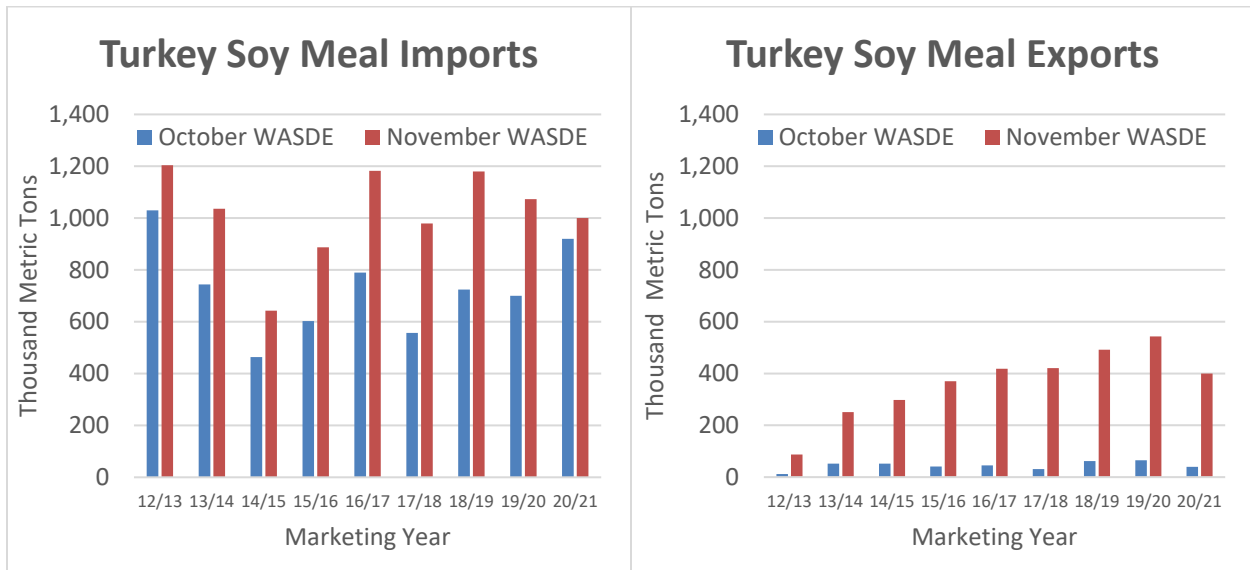

Dry weather has reduced sunflowerseed yields in Ukraine and Russia, leading to a combined 1.5-million-ton decline in the projected output this month. From the initial forecast in May, combined production is down 5.5 million tons with a year-to-year decline of 4.8 million tons. Global sunflowerseed production is 5.3 million tons below 2019/20 with additional declines forecast for the European Union, Kazakhstan, Turkey and Argentina. Although this drop in output is significant and unexpected, the 2020/21 global harvest is still on-track to be the third largest ever.

As Russia and Ukraine represent over three-quarters of total sunflowerseed meal and oil trade, these smaller crops portend an outsized impact on products trade. These tighter exportable supplies come at a time of stronger global demand for protein meals and oils coupled with general tightening of oilseed and product markets. Consequently, lower availability of sunflower meal and oil contributes to the general strengthening in oilseed and product prices over the past few months.

Global sunflower oil prices have outgained the other major vegetable oils, up 25 percent in Argentina and Ukraine since August. In fact, prices for all major vegetable oils have strengthened. For example, August to October average export prices are up about 5 percent for rapeseed oil, 15 percent for U.S. and Argentina soy oil, nearly 20 percent for Malaysia and Indonesia palm oil.

Major Turkey Oilseeds Data Revisions

Trade data for Turkey was revised from 2013 to include trade entering and leaving customs warehouses and free zones. As a result, there are some notable increases to both Turkey imports and exports. The most substantial change in oilseeds affected Turkey soy meal, which boosted both imports and exports every year since 2013. Additionally, these changes had a ripple effect on data series for major importers of Turkey oilseeds and products such as Iran, Iraq, Syria, and Egypt.

PROJECTION FOR 2020/21

Global 2020/21 oilseed production is forecast at 597 million tons, down 8 million from October. Lower soybean output in the United States, Argentina and India, and sunflowerseed production, principally in Ukraine and Russia, lead to this month's decline. Dry weather is a principal driver in many markets with lower sunflowerseed production and soybeans in the United States and India reflecting harvest data. In Argentina, economic considerations are expected to dampen prospects for expanding acreage. Lower production is projected to reduce soybean and sunflowerseed crush with only minimal impact on global export volume. Global oilseed ending stocks are reduced 3 million to 99 million tons primarily on lower soybean ending stocks in the United States.

Protein meal and oil trade is significantly lower, reflecting the smaller crush and lower exports of soybean and sunflowerseed meal and oil. Meal trade declines are dominated by soybean meal where higher meal extraction rates led to larger production declines. Soybean meal exports are lowered 1 million tons to 66 million. Most of the decline is projected in Argentina where reluctant producer selling, along with lower soybean production, will continue to depress crush volume and product exports into 2021. Growing meal demand, combined with lower crush, will reduce soybean meal export availability in India. Sunflowerseed meal exports are down 463,000 tons to 7 million, mostly from Ukraine where production declines are greater. Global vegetable oil exports are down 540,000 tons to 86 million. Declines are skewed more to sunflowerseed oil reflecting the higher oil yields from crush and, consequently, larger production declines relative to soybean oil. The projected U.S. season-average farm price for soybeans is raised \$0.60 to \$10.40 per bushel in response to continued price strength, \$2.05/bu above the August forecast.

PROJECTION FOR 2019/20

Global oilseed production is down 600,000 tons to 576 million in response to a series revision for palm kernel and peanut production in Ghana. Oilseed exports are mostly unchanged with crush down 770,000 tons, primarily in response to lower production in Ghana. Changes in meal and oil exports reflect final year adjustments, with meal exports up 610,000 tons to 94 million and oil mostly unchanged at 87 million tons. Global oil stocks remain unchanged at 22 million tons.

Soybean export prices for the world's three largest exporters all strengthened for the fifth straight month, reaching the highest prices since July of 2016 for the United States and Argentina, and since September

of 2014 for Brazil. Prices continue to surge on strong export demand, depleted South America supply, and lower carry-in from 2019/20.

Meal prices built on September momentum to further strengthen throughout October. Price growth is mostly attributed to climbing soybean prices.

Source: International Grains Council

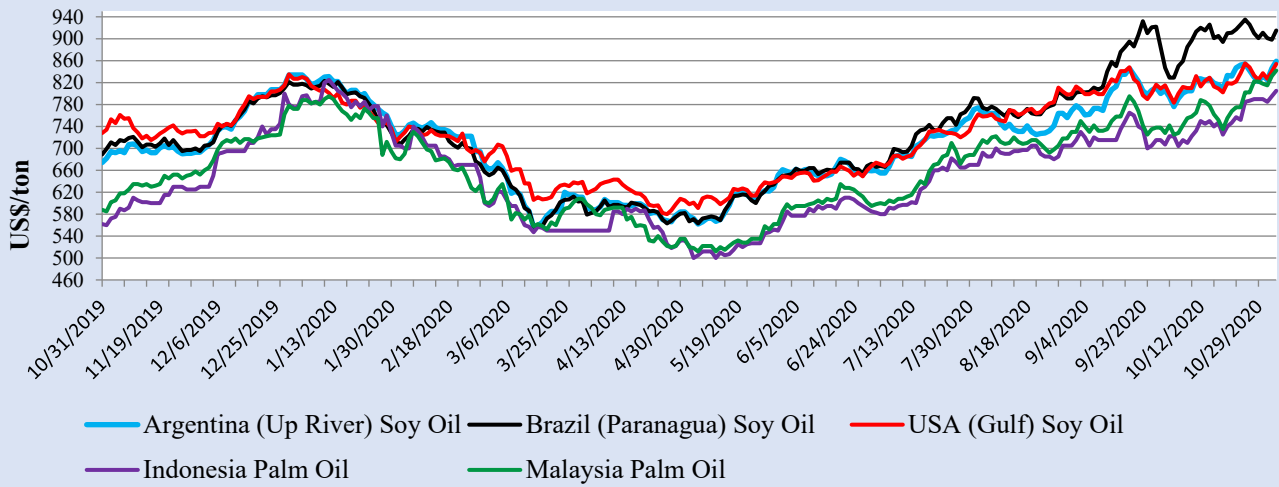

Rising oil prices persisted in October due to strong demand for oils, reduced soybean crush in South America, and reduced sunflower crush in Europe. Brazil soy oil prices recovered from a significant drop at the end of September owing to tight supplies and strong biodiesel demand. Palm oil prices continued to rally, tracking strong rival oil prices and reflecting production concerns in Malaysia, and Indonesia.

EXPORT SALES

As of the week ending October 29, 2020, U.S. soybean accumulated exports (shipments) to China totaled 12.1 million tons and 4.5 million to the rest of the world. Outstanding sales reached 14.7 million tons to China and 17.2 million to the rest of the world, including unknowns. During the same time period last year, accumulated exports to China were 2.5 million tons and 6.9 million to the rest of the world while outstanding sales to China were 4.7 million tons and 6.9 million to the rest of the world, including unknown destinations. U.S. soybean export commitments (outstanding sales plus accumulated exports) to China soared to 26.8 million tons compared to 7.1 million the previous year. Total commitments to the world, including unknown destinations, have more than doubled to 48.5 million tons compared to 20.9 million last year.
