

Oilseeds: World Markets and Trade

Argentine Soybean Oil Exports Grow with Declining Biodiesel Trade

Source: Production, Supply & Distribution (PSD) database for soybean oil and Argentina National Institute of Statistics for biodiesel. Note: Data is based on Argentina's Local April/March Marketing Year (MY). The April 2020 - March 2021 year corresponds to the 2019/20 MY (local) in the PSD database and table 23 in the circular. The biodiesel export number for 2020/21 is a forecast based on April 2020 to February 2021 data.

With declining demand for biodiesel, Argentina exports of soybean oil have been rising despite lower crush. Local year 2020/21 (April-March) soybean oil exports are estimated at 5.9 million tons, 800,000 tons above the previous year, and come despite a 4-million-ton decrease in soybean crush and 600,000-ton decline in soybean oil output.

Biodiesel exports, produced primarily from soybean oil, have declined from nearly 1.8 million tons in 2017/18 to an estimated 400,000 tons in 2020/21. Relatively low global energy prices, barriers to imports, and recently, higher vegetable oil prices, all play a role in reducing biodiesel export prospects. This has freed up an estimated 750,000 tons of soybean oil for the food market and for exports.

Demand for soybean oil exports remains strong. Exportable supplies in Brazil and the United States are down in response to growing diversion of supplies to the fuel markets. Prices for competing oils have risen faster than those for soybean oil, while palm oil supplies remain tight on lower production growth.

Argentine soybean producers have been reluctant sellers this year. Despite the rise in global prices, high inflation, export taxes, and a strong peso have discouraged producers from selling additional supplies of soybeans beyond the amount needed to meet expenses. Additionally, while soybean prices have risen on strong China demand and growing demand for crush in Brazil and the United States, global import demand for soybean meal has lagged in comparison due to its relatively small discount to soybeans. Given Argentina's role as the largest soymeal exporter, without strong demand for soybean meal exports, boosting soybean oil supplies by expanding crush is difficult. Consequently, with most of the reduction in biodiesel exports already in place and amid difficulties in raising crush, additional expansion in Argentina's soybean oil exports may be difficult to achieve in the coming year (April 2021-March 2022).

Note: Effective January 1, 2021, the separation of the United Kingdom (UK) from the European Union (EU) is complete, including trade between both entities. FAS will continue using the term "European Union" to mean the countries involved in the previous customs union, i.e., EU27+UK, from January 2021 through April 2021 for field crops PSDs (except cotton). Starting in May 2021 with the release of 2021/22 data, field crops PSDs will reflect EU27 and UK separately. Beginning with the release of 2021/22 (or calendar year 2022) data for each commodity group (except cotton), historical data for both EU27 and the UK will be provided for 5 years (2016/17 through 2020/21; or calendar years 2017 through 2021). Cotton PSDs have been and will continue to be maintained on an individual country-level basis, including the UK.

PROJECTION FOR 2020/21

Global 2020/21 oilseed production is forecast at 596 million tons, 750,000 tons above February. Higher Brazil soybean production coupled with greater Australia and European Union rapeseed production more than offsets lower palm kernel, cottonseed, and sunflowerseed production forecasts.

Global oilseed exports, at 195 million tons, are up 820,000 tons primarily on higher Australia and Ukraine rapeseed exports. Oilseed crush is raised 1,210,000 tons to 514 million. Larger Brazil and Argentina soybean crush and European Union rapeseed crush more than offset lower China soybean crush. Global oilseed stocks are up 760,000 tons mostly on higher Brazil and China soybean stocks more than offsetting lower Argentina soybean stocks.

Protein meal production is up 1,150,000 tons and ending stocks are up 910,000 tons. Protein meal exports are raised 890,000 tons due to a 1-million-ton increase in Argentina soybean meal shipments partially offset by other changes. Global vegetable oil production is down 200,000 tons despite higher crush as lower palm oil production more than offsets higher rapeseed oil and soybean oil production. Vegetable oil exports are up 350,000 tons on higher Argentina soy oil and Black Sea sunflower oil. Ending stocks are up 520,000 tons primarily due to higher India palm oil carryout. The projected U.S. season-average farm price for soybeans is unchanged at \$11.15 per bushel.

EXPORT PRICES

February 2021 Soybean Export Prices

	U.S.	Argentina	Brazil
February Avg Price	\$ 539/ton	\$ 554/ton	\$ 522/ton
Change vs January	- \$ 3/ton	- \$ 2/ton	- \$ 13/ton

Source: International Grains Council. All prices are FOB: U.S. Gulf, Argentina Up River, and Brazil Paranagua.

Export prices for the three largest soybean exporters were given a slight reprieve as average prices declined in February on expectations of seasonally large new-crop exportable supplies in Brazil and Argentina. Prices in the United States and Argentina remained relatively flat while Brazil fell slightly as expectations of a large crop were mostly offset by slow harvest progress.

February 2021 Soybean Meal Export Prices

	U.S.	Argentina	Brazil
February Avg Price	\$ 513/ton	\$ 476/ton	\$ 483/ton
Change vs January	- \$ 21/ton	- \$ 40/ton	- \$ 34/ton

Source: International Grains Council. All prices are FOB: U.S. Gulf, Argentina Up River, and Brazil Paranagua.

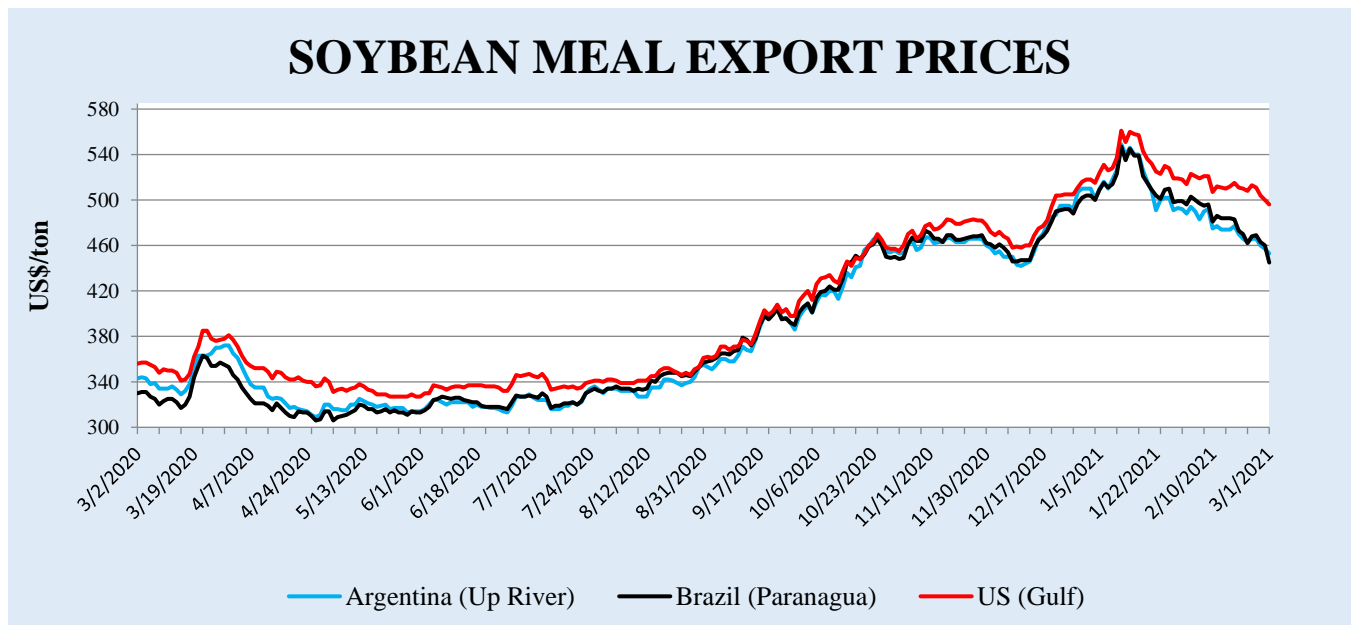

Meal prices declined throughout February reflecting the seasonal ramp-up in crush and availability of new-crop supplies with the onset of the soybean harvest in Brazil and Argentina coupled with softer demand for soybean meal.

February 2021 Soybean and Palm Oil Export Prices

	U.S. Soybean Oil	Argentina Soybean Oil	Brazil Soybean Oil	Indonesia Palm Oil	Malaysia Palm Oil
February Avg Price	\$ 1118/ton	\$ 1078/ton	\$ 1063/ton	\$ 1054/ton	\$ 1020/ton
Change vs January	+ \$ 68/ton	+ \$ 21/ton	+ \$ 10/ton	+ \$ 19/ton	+ \$ 30/ton

Source: International Grains Council; all prices are FOB: U.S. Gulf, Argentina Up River, Brazil Paranagua

Oil prices continued their nearly 12-month climb through February but gains were partially offset by softening prices in the last few days of the month. Palm oil prices continued to rally to near 9-year highs in February tracking strong rival oil prices and tight stocks.

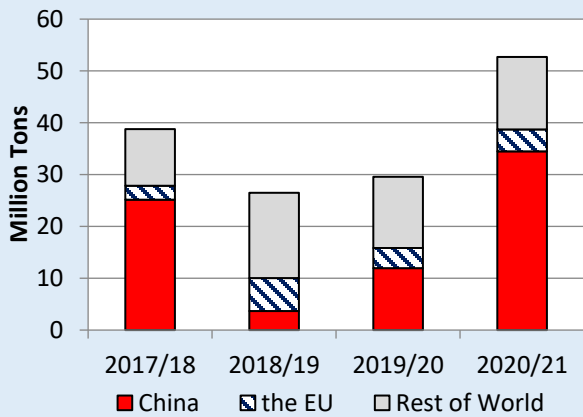

SOYBEAN AND PALM OIL EXPORT PRICES

EXPORT SALES

**U.S. Soybean Accumulated Exports
As of February 25, 2021**

**U.S. Soybean Outstanding Sales
As of February 25, 2021**

As of February 25, 2021, cumulative global U.S. soybean shipments reached 52.7 million tons, with China accounting for 65 percent (34.5 million tons). This pace for exports to China is nearly triple from the same period in 2019/20. Outstanding sales to all destinations reached 7.5 million tons, up nearly 70 percent from last year. These are led by outstanding sales to China of just over 1.0 million tons, which are more than triple last year. Due to growth in sales and exports to China, total export sales commitments reached a record 60.0 million tons, up 70 percent (26.0 million tons) from last year.

U.S. Soybean Export Sales as of Feb 25, 2021
(Million Tons)

	Feb 27 2020	Feb 25 2021	Net Change YOY	% Change
