

Oilseeds: World Markets and Trade

Market Signals to Sell Soybean Stocks

Source: Chicago Board of Trade (CBOT) U.S. Soybean Future Prices

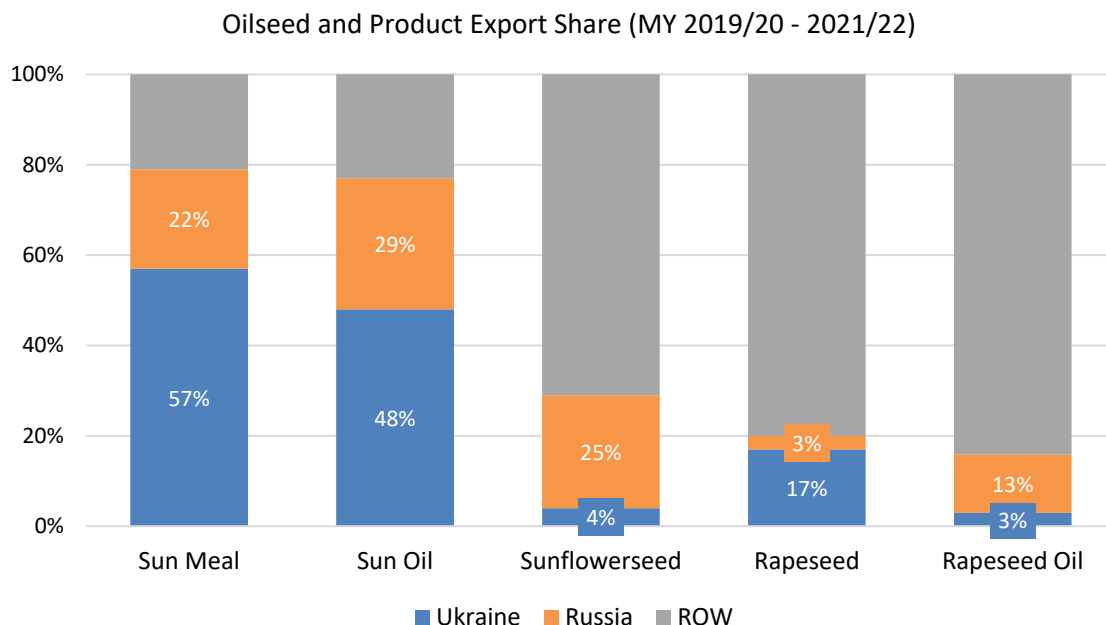

With a decline in South America soybean production and uncertainty regarding export prospects for sunflower products out of the Black Sea region, soybean prices have risen dramatically in recent months. The May contract on the Chicago Board of Trade (CBOT) has risen 38 percent since early December, or nearly \$4.70/bushel, to \$17.07 on March 8. The November contract for new-crop soybeans has risen at a more modest pace (21 percent), adding nearly \$2.60/bushel to the contract price since early December. This has led to a widening premium for old-crop soybeans versus new-crop in the United States. Premiums that were near 2 percent in November 2021 are currently 15 percent in early March.

The result is higher prices and widening premiums which encourage selling now versus holding stocks into the 2022 U.S. harvest. However, it also discourages near-term purchases by buyers that can afford to wait until later in the year. This is observed in U.S. Export Sales data which shows a faster pace of sales for new crop soybeans, particularly to China. In addition, China is expected to increase reserve selling that will offset some near-term sales from Brazil in the coming months.

A slower pace of China soybean imports from Brazil is almost a necessity given the current high prices and dramatic decline in soybean supplies in South America. Strong soybean price appreciation observed for February has slowed for the November contract in early March suggesting a better balance of demand with supply, at least in the longer term. However, considerable volatility remains possible, particularly in near-term contracts, given the changing situation in Ukraine and energy markets and with U.S. planting intentions due at the end of the month.

MARKET FEATURES

Conflict in Ukraine Creates Uncertainty for Oilseed and Product Exports

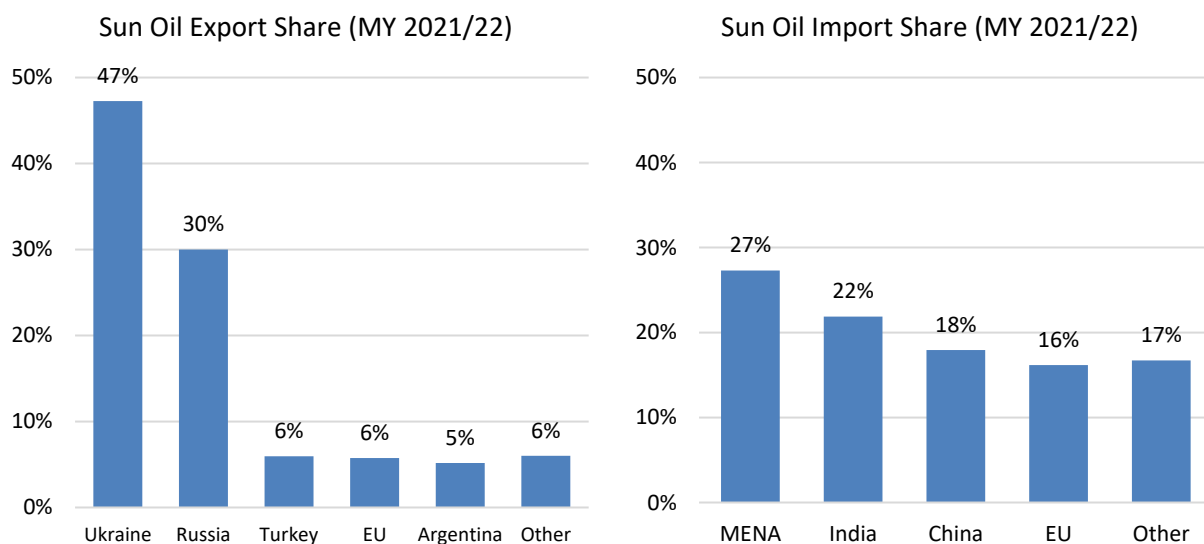

Russia's invasion of Ukraine on February 24 has already significantly impacted global markets. Since the start of the conflict, crush facilities and ports in Ukraine have suspended operations, and other countries have imposed sanctions on Russia limiting trade from the region. This month's forecast represents an initial assessment of the short-term impacts as a result of this action.

Sunflowerseed Complex: In a typical year, Ukraine and Russia account for about 80 percent of global sunflowerseed meal and sunflowerseed oil trade. Due to port and crushing facility closures in Ukraine, sunflowerseed and product exports have been cut this month: seed exports are down 57 percent, oil exports are down 14 percent, and meal exports are down 13 percent. As a result, Ukraine sunflowerseed ending stocks are up nearly seven-fold this month to 1.9 million tons. Similarly, domestic consumption (feed and waste) has more than tripled this month on an increase in damaged and spoiled product as well as increased full-fat feeding while meal production is halted. In Russia, export reductions are more muted with exporters facing uncertainties in Black Sea shipping routes and the impacts of sanctions. Russia exports are down 33 percent for sunflowerseed, 4 percent for sunflowerseed oil, and 3 percent for sunflowerseed meal.

While Russia and Ukraine account for the majority of sunflowerseed product exports, sunflowerseed oil and sunflowerseed meal are important but relatively small in terms of global consumption. In a typical year, sunflowerseed oil accounts for about 9 percent of global vegetable oil consumption and sunflowerseed meal accounts for about 5 percent of total soybean meal equivalent consumption of protein meals. Uncertainty over Black Sea exports have led competing Argentina prices to jump 47 percent for sunflowerseed oil and 27 percent for sunflowerseed meal in less than 2 weeks (Feb 23-Mar 8, IGC Argentina FOB Up River).

Rapeseed Complex: Together, Ukraine and Russia account for about one-fifth of rapeseed exports and a little more than 15 percent of rapeseed oil exports. Ukraine rapeseed and product exports are front-loaded during the marketing year, and as a result were largely shipped prior to the conflict. Hence, Ukraine rapeseed exports are unchanged this month as nearly all were shipped between July 2021 and December 2021. Similarly, rapeseed meal and oil export forecasts are unchanged this month. Conversely, Russia rapeseed exports are down 33 percent this month on weak exports to China over the first half of the marketing year. However, Russia rapeseed crush and oil exports are both forecast up this month on lower rapeseed exports and strong rapeseed oil sales to China and Norway in 2021.

Global Vegetable Oil Markets Tighten Further on Disruption in Black Sea Exports

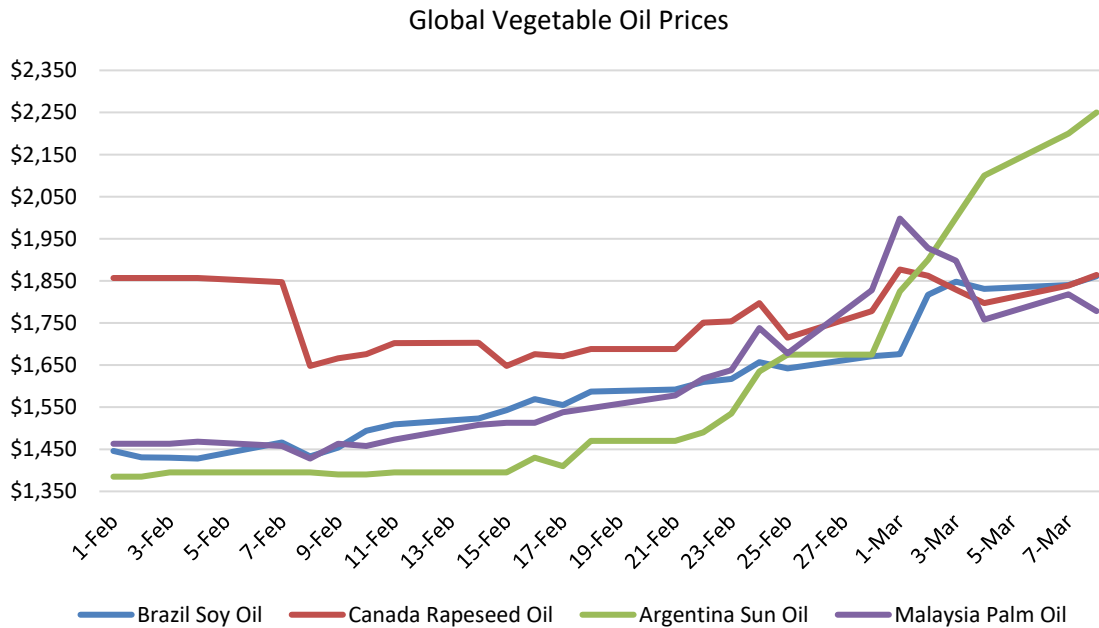

Conflict in the Black Sea region has shut down sunflowerseed oil exports from both Ukraine and Russia. Combined, the region represents roughly 80 percent of global sunflowerseed oil exports. Sunflowerseed oil accounts for only 12 percent of global food oil consumption and 9 percent of total vegetable oil consumption (including biofuels and other industrial uses). Its share of global vegetable oil trade is similar to soybean oil at 14 percent of global trade.

This is particularly concerning to countries that rely on imported sunflowerseed oil to meet domestic needs. The main importers include India and China, the largest importers of vegetable oil, as well as the EU and many Middle East and North Africa (MENA) countries including Turkey, Iran, and Egypt.

Finding alternative vegetable oils will be a challenge in a market that has been facing tight supplies even before the events in Ukraine. Drought in Canada last year significantly reduced rapeseed for crush and export. Canada is the world's largest exporter of rapeseed oil, representing more than half of global exports. Increasing export volume prior to the 2022 harvest is a non-starter. Likewise, drought in South America has reduced soybean supplies by 14 million tons from last year and this is forecast to be the lowest harvest in 6 years. As with rapeseed, it will be difficult for South America to significantly increase soybean oil exports without a reduction in seed exports or diversion of oil from biofuel. A similar situation exists with palm oil where supplies have been tight on lower production growth. Complicating

matters are export restrictions imposed by Indonesia, the largest palm oil exporter, in order to reduce the impact of higher prices on its consumers.

Source: International Grains Council

The growing tightness in vegetable oil supplies is evident in price trends over the past 5 weeks. The drought in Canada last year has kept Canadian rapeseed at high levels over the past 6 months while the shortfall in South America soybean production contributed to the rise in soybean and palm oil prices in February. Sunflowerseed oil prices have been on the rise since the situation in the Black Sea region deteriorated in late February. For example, sunflowerseed oil prices in Argentina have soared and reached \$2,250/ton as of March 8. In early February, sunflowerseed oil was well positioned to increase its share of global trade and consumption amid high premiums for rival oils but is now more expensive and less accessible than substitutes.

PROJECTION FOR 2021/22

Global oilseed and product forecasts are almost entirely down this month as dry weather in South America further reduces soybean production and the conflict in Ukraine increases uncertainty of Black Sea trade. Global 2021/22 oilseed production is down nearly 2 percent on lower soybean production in Brazil, Argentina, Paraguay, and Uruguay, more than offsetting gains in Australia rapeseed. Global crush is down more than 1 percent driven by lower China and Brazil soybean and Ukraine sunflowerseed processing. Trade is down on lower South America soybean and Black Sea sunflowerseed exports more than offsetting higher U.S. soybean and Australia rapeseed exports. Global ending stocks are little changed overall as smaller China, South America, and U.S. soybean carryout is mostly offset by higher Ukraine and Russia sunflowerseed and Australia and Canada rapeseed stocks.

Global production of protein meal is forecast down in tandem with crush. Protein meal trade is down 2 percent, primarily on lower Ukraine sunflowerseed meal and Brazil and Paraguay soybean meal exports. Protein meal consumption is down partially on lower soybean and sunflowerseed meal usage in China. Global ending stocks are up 3 percent on larger soybean meal carryout, partially offset by lower sunflowerseed meal stocks. Global vegetable oil production is down in line with lower soybean and sunflowerseed crush. Trade is down predominantly on lower Ukraine and Russia sunflowerseed oil exports to India, the European Union, and China, more than offsetting higher Brazil, Argentina, and U.S. soybean oil exports. Global consumption is down slightly due to lower production and trade of soybean and sunflowerseed oil. Ending stocks are up marginally on higher global soybean oil and India palm oil carryout, which more than offset lower sunflowerseed oil stocks. The projected U.S. season-average farm price for soybeans is up 25 cents to \$13.25 per bushel.

EXPORT PRICES

February 2022 Soybean Export Prices

	U.S.	Argentina	Brazil
February Avg Price	\$ 632/ton	\$ 649/ton	\$ 633/ton
Change vs January	+ \$ 69/ton	+ \$ 47/ton	+ \$ 86/ton

Source: International Grains Council. All prices are FOB: U.S. Gulf, Argentina Up River, and Brazil Paranaqua.

Soybean prices continued to rise in February due to the drought in South America. Brief rains in late February relieved pressure on rising soybean prices for 1 day before peaking in early March. Prices soared to at least 2-decade highs in Argentina and 10-year highs in the United States and Brazil.

February 2022 Soybean Meal Export Prices

	U.S.	Argentina	Brazil
February Avg Price	\$ 538/ton	\$ 505/ton	\$ 534/ton
Change vs January	+ \$ 49/ton	+ \$ 41/ton	+ \$ 65/ton

Source: International Grains Council. All prices are FOB: U.S. Gulf, Argentina Up River, and Brazil Paranagua.

Soybean meal prices shot up further in February reflecting higher soybean prices. High crush margins and demand in Brazil and the United States strengthened prices while Argentina crush and soybean meal exports weakened as farmers remain reluctant sellers.

February 2022 Soybean and Palm Oil Export Prices

	U.S. Soybean Oil	Argentina Soybean Oil	Brazil Soybean Oil	Indonesia Palm Oil	Malaysia Palm Oil
February Avg Price	\$ 1,584/ton	\$ 1,532/ton	\$ 1,533/ton	\$ 1,551/ton	\$ 1,541/ton
Change vs January	+ \$ 126/ton	+ \$ 159/ton	+ \$ 143/ton	+ \$ 139/ton	+ \$ 188/ton

Source: International Grains Council; all prices are FOB: U.S. Gulf, Argentina Up River, Brazil Paranagua

Soybean and palm oil prices rose sharply in February and into March. Increasingly tight global vegetable oil supplies coupled with rising soybean prices and events in Ukraine contributed to the higher prices.

2021/22 OUTLOOK CHANGES (All figures are in thousand metric tons)

Country	Commodity	Attribute	Previous	Current	Change	Reason
Argentina	Oilseed, Soybean	Exports	3,750	2,750	-1,000	Smaller production
	Oilseed, Soybean	Imports	3,100	2,900	-200	Lower exports from Paraguay
Australia	Meal, Soybean	Imports	900	700	-200	Higher prices and weaker trade trend
	Oilseed, Rapeseed	Exports	4,400	4,800	400	Larger production
Bangladesh	Meal, Soybean	Exports	350	120	-230	Trade trend and higher prices
	Oilseed, Soybean	Imports	3,000	2,550	-450	
Belarus	Oilseed, Soybean	Imports	550	350	-200	Lower trade with Ukraine and Russia
Brazil	Meal, Soybean	Exports	16,850	16,500	-350	Smaller production
	Oilseed, Soybean	Exports	90,500	85,500	-5,000	
	Oil, Soybean	Exports	1,525	1,700	175	Strong demand on high prices and tight availability of other oils
Canada	Oilseed, Soybean	Exports	4,200	4,400	200	Trade trend
China	Meal, Sunflowerseed	Imports	2,065	1,765	-300	Reduced exports from Ukraine
	Oil, Sunflowerseed	Imports	2,180	1,970	-210	
	Oilseed, Soybean	Imports	97,000	94,000	-3,000	Weaker demand and selling reserves
Egypt	Oilseed, Soybean	Imports	4,000	3,600	-400	High prices and lower South America exports
European Union	Meal, Sunflowerseed	Imports	2,970	2,725	-245	Lower exports from Ukraine and Russia
	Oil, Sunflowerseed	Imports	2,050	1,775	-275	
	Oilseed, Sunflowerseed	Imports	810	600	-210	Higher exports from Australia
	Oilseed, Rapeseed	Imports	4,975	5,220	245	
	Oilseed, Soybean	Imports	14,800	14,500	-300	
India	Meal, Soybean	Imports	700	500	-200	Trade data
	Oil, Soybean	Imports	3,200	3,550	350	Offsetting lower sun oil imports for food use
	Oil, Sunflowerseed	Imports	2,700	2,400	-300	Lower trade with Ukraine and Russia
Pakistan	Oilseed, Soybean	Imports	2,605	2,400	-205	Slower import pace
Paraguay	Meal, Soybean	Exports	1,285	1,100	-185	Smaller production
	Oilseed, Soybean	Exports	4,150	3,600	-550	
	Oil, Sunflowerseed	Exports	3,800	3,650	-150	
Russia	Oilseed, Rapeseed	Exports	450	300	-150	Trade trend and trade disruptions
	Oilseed, Sunflowerseed	Exports	900	600	-300	
	Oilseed, Soybean	Exports	1,250	1,000	-250	Lower exports from Brazil and Paraguay
	Oilseed, Soybean	Imports	2,100	1,600	-500	

Turkey	Oilseed, Sunflowerseed	Imports	1,350	1,100	-250	Lower trade with Ukraine and Russia
Ukraine	Meal, Sunflowerseed	Exports	5,600	4,850	-750	Lower crush and trade disruptions
	Oil, Sunflowerseed	Exports	6,650	5,750	-900	
	Oilseed, Sunflowerseed	Exports	350	150	-200	Trade trend and trade disruptions
United States	Oilseed, Soybean	Exports	1,850	1,550	-300	Higher sales on competitive prices compared to Brazil
	Oilseed, Soybean	Exports	55,792	56,880	1,088	
Uruguay	Oilseed, Soybean	Exports	2,530	1,950	-580	Smaller production
