

# Oilseeds: World Markets and Trade

## U.S. Soybean Oil Premiums Rise as Prices Follow Energy Higher

### U.S. Soybean Oil Premium\*

\*U.S. Gulf vs. average Brazil and Argentina port quotes

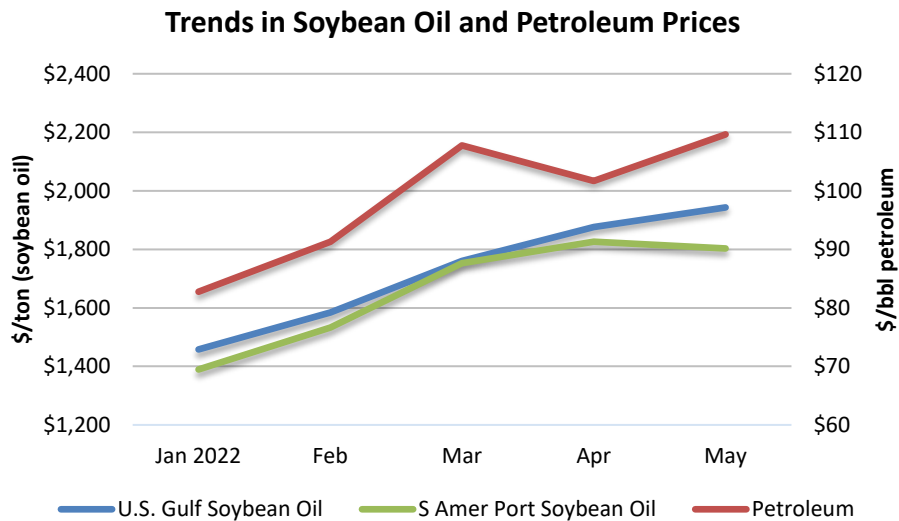

Premiums for U.S. soybean oil vis-à-vis South American, as measured by export quotes, have risen to near \$150/ton. This is up from \$20/ton observed in early April. While the increase has been significant, the premium remains well below the level reached in June 2021 when premiums peaked just short of \$400/ton and averaged near \$270/ton for the April to August period. On a percentage basis, current premiums are also lower at 8 percent, compared to 20 percent last year.

The rising price premiums for U.S. soybean oil reflect a stronger demand versus supply balance in the United States relative to Brazil and Argentina. The U.S. domestic market is projected to consume 93 percent of all soybean oil produced this year. This compares to 80 percent in Brazil and 13 percent in Argentina when biodiesel exports are factored in. The United States is also a net importer of vegetable oil with imports projected to account for almost a quarter of total domestic use. This shows the role that domestic demand plays in setting prices in the United States, in contrast to both Brazil and Argentina where global demand factors play a larger role.

Projected demand for industrial uses, including biodiesel, is driving demand in the United States. While food and feed use of all oils in the United States are projected to grow less than 1 percent through the 2022/23 marketing year, industrial uses are projected to grow 28 percent and essentially accounts for all consumption growth. Total domestic oil consumption is forecast 9 percent higher in 2022/23 compared to 2 years ago.

This contrasts with Brazil where domestic oil demand is forecast to decline in the coming year from 2020/21. Industrial use is projected to account for two-thirds of the decline as Brazil has reduced its blending requirement for biodiesel. With declining domestic demand, there is less price pressure in the Brazilian market. There is also less pressure on soybean oil prices in Argentina, despite rising biodiesel production, due to the much smaller domestic footprint for both food oil and biodiesel.

## Soybean oil prices rise with energy prices

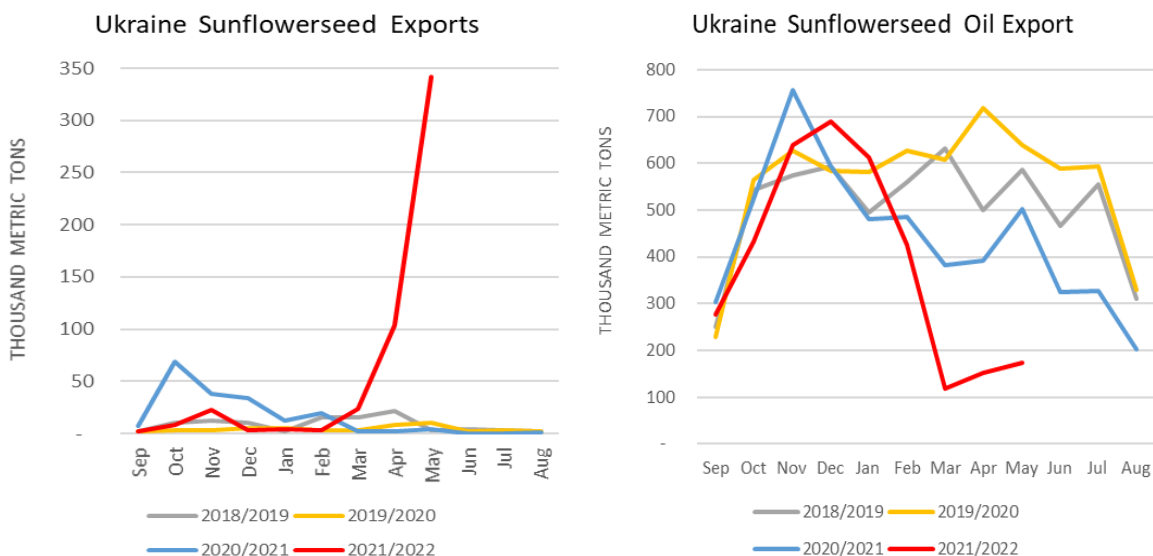

Both soybean oil and petroleum prices have shown dramatic increases in 2022. Soybean oil prices in early June are up more than a third in the United States and 20 percent in South America. This compares to petroleum prices which are up 45 percent for the same period. In the past, particularly in the mid-2000s, rising energy prices were the primary price driver for vegetable oils. However, the situation is different today with rising vegetable oil prices reflecting tight supplies. Droughts in Canada and South America, along with events in Ukraine and trade-restricting policies in some countries, have reduced available vegetable oil supplies.

While neither market is directly impacting prices in the other, higher energy values raise the floor for vegetable oil prices, providing support for the energy portion of the vegetable oil market. As vegetable oil supplies eventually grow, resulting price declines will be limited if current high energy prices continue.

## MARKET FEATURES

### Russia's Invasion of Ukraine Severely Disrupts the Sunflowerseed Market

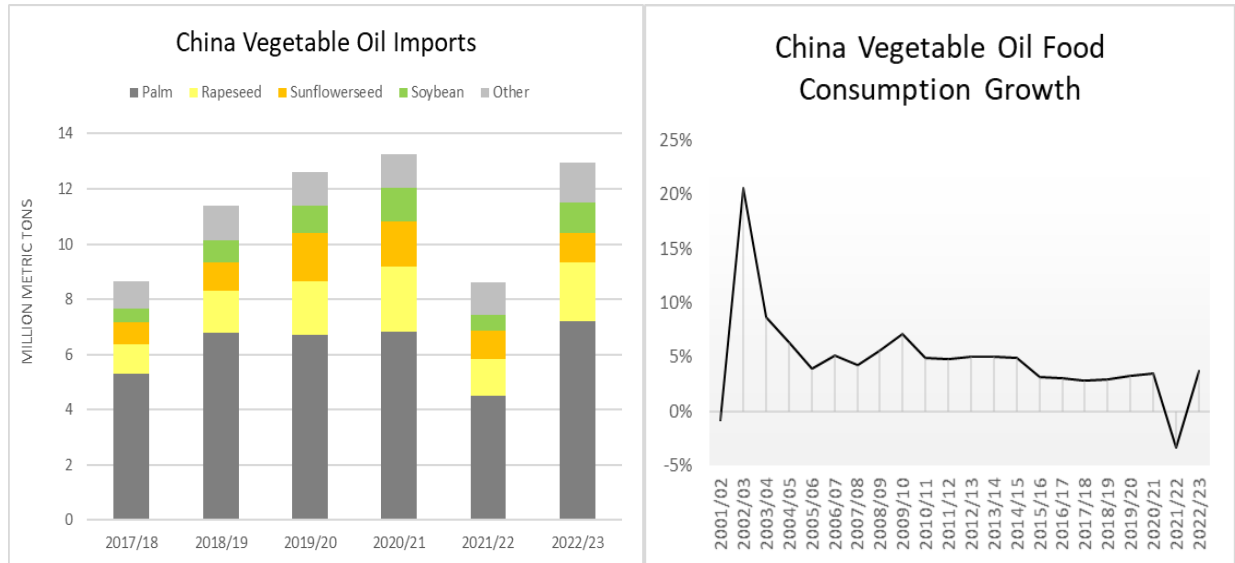

Russia's invasion of Ukraine has restricted access to the Black Sea and has drastically changed export logistics. Ukraine is normally the world's top producer of sunflower seed and top exporter of sunflower meal and oil. However, significant disruptions of supplies and supply chains following the invasion have changed the dynamics. Temporary closures of some oilseeds crushing plants, lack of access to seaports, as well as continued uncertainty, have led Ukraine to seek alternative export routes in order to ship significant amounts of sunflowerseed through its western border with the European Union.

As crushing plants continue to suspend operations on safety concerns, the MY2021/22 sunflowerseed crush forecast is lowered 1.5 million tons to 10.5 million, leaving more seed available for export. During the September to May period, sunflowerseed exports are estimated at more than 500,000 tons, a threefold increase over the same period last marketing year. Through the first half of the marketing year (September - February), seed exports were below the 5-year average. This changed with Russia's invasion as sunflowerseed exports skyrocketed in the March to May period as shipping from Black Sea ports became impossible. With large exportable supplies and exports surging, the MY2021/22 sunflowerseed export forecast is raised to 1.0 million tons with the EU accounting for the largest share of shipments. At the same time, meal and oil exports are reduced as shipments – although continuing to increase since the war started – are lagging behind last year's volumes. With shipments from Black Sea ports essentially shut down, sunflowerseed oil is being transported to the EU by rail or trucked and barged to Black Sea ports in Romania.

Even as Ukraine is actively working with its partners to export as many oilseeds and products as possible, the war and condition of critical infrastructure continue to challenge its efforts to supply sunflowerseed oil and meal to global markets.

## 2021/22 China Vegetable Oil Imports Slashed on Weaker Demand and High Global Prices

Recent COVID lockdowns in China and high global vegetable oil prices are resulting in significant demand disruptions, leading to a slower import pace for the major cooking oils such as palm, soy, and rapeseed. MY2021/22 vegetable oil imports are slashed to 2017/18 levels with palm oil imports reduced by 500,000 tons, soybean oil 350,000, and rapeseed oil 150,000 this month. Additionally, sunflowerseed oil imports are cut 500,000 tons as Russia’s invasion of Ukraine has significantly disrupted logistics and shipments of oilseeds and products to global markets.

As a result, China vegetable oil consumption is projected to decline for the first time since the early 2000s. Total food consumption is estimated at 36.1 million tons, down 3 percent from the previous marketing year. Next year, consumption is projected to return to normal levels with a total vegetable oil consumption at 37.5 million tons (total vegetable oil food consumption).

### **PROJECTION FOR 2022/23**

Global 2022/23 oilseed production is forecast at nearly 647 million tons, slightly lower compared to May, as reduced sunflowerseed in Ukraine and rapeseed in the European Union more than offset gains for soybeans in Ukraine and Zambia and rapeseed in Australia.

Oilseed exports are raised on Australia rapeseed and Ukraine soybeans which exceed a reduction for Argentina sunflowerseed. Global vegetable oil trade is slightly lower on reductions for Ukraine sunflowerseed oil exports which more than offset gains for Turkey sunflowerseed oil and Canada rapeseed oil exports. Global protein meal exports are slightly lower this month following reduced sunflowerseed production in Ukraine as well as lower rapeseed meal in India.

Global oilseed stocks are up nearly 1 million tons primarily on larger Argentina soybean stocks. The projected U.S. season-average farm price for soybeans is up 30 cents to a record \$14.70 per bushel.

### **PROJECTION FOR 2021/22**

Global 2021/22 oilseed production is forecast at 599 million tons, over 2 million greater than in May. Larger soybean crops in Argentina, Brazil, and Zambia as well as higher rapeseed output in India more than offset lower cottonseed for India.

Oilseed imports are up on higher sunflowerseed for the European Union and soybeans for Argentina and Turkey which exceed lower imports of rapeseed for Pakistan and the European Union. Oilseed exports are slightly lower this month as reductions for Canada rapeseed and Brazil soybeans more than offset gains for Ukraine sunflowerseed.

Global vegetable oil imports are down this month following reductions for China palm, sunflowerseed, soybean, and rapeseed oil which exceed gains for sunflowerseed oil imports for Turkey. Exports are down this month on reductions for palm oil in Malaysia and Indonesia, palm kernel oil for Indonesia, and sunflowerseed oil in Ukraine. Global protein meal trade is up this month primarily on higher soybean meal exports for Argentina, Brazil, the European Union, and Turkey. Meal imports are raised for the European Union and China.

Global oilseed stocks are up nearly 2 million tons, primarily on larger Argentina and Brazil soybean and Ukraine sunflowerseed stocks. The projected U.S. season-average farm price for soybeans is up 10 cents to \$13.35 per bushel.

## EXPORT PRICES

### May 2022 Soybean Export Prices

	U.S.	Argentina	Brazil
<b>May Average Price</b>	<b>\$667/ton</b>	<b>\$649/ton</b>	<b>\$665/ton</b>
<b>Change vs. April</b>	<b>-\$4/ton</b>	<b>-\$3/ton</b>	<b>-\$3/ton</b>

Source: International Grains Council. All prices are FOB: U.S. Gulf, Argentina Up River, and Brazil Paranagua.

Prices were down marginally from last month but remain within a range of \$650 to \$670/ton. Prices have generally stayed in the range of \$620 to \$700/ton since late February, starting with Russia's invasion of Ukraine.

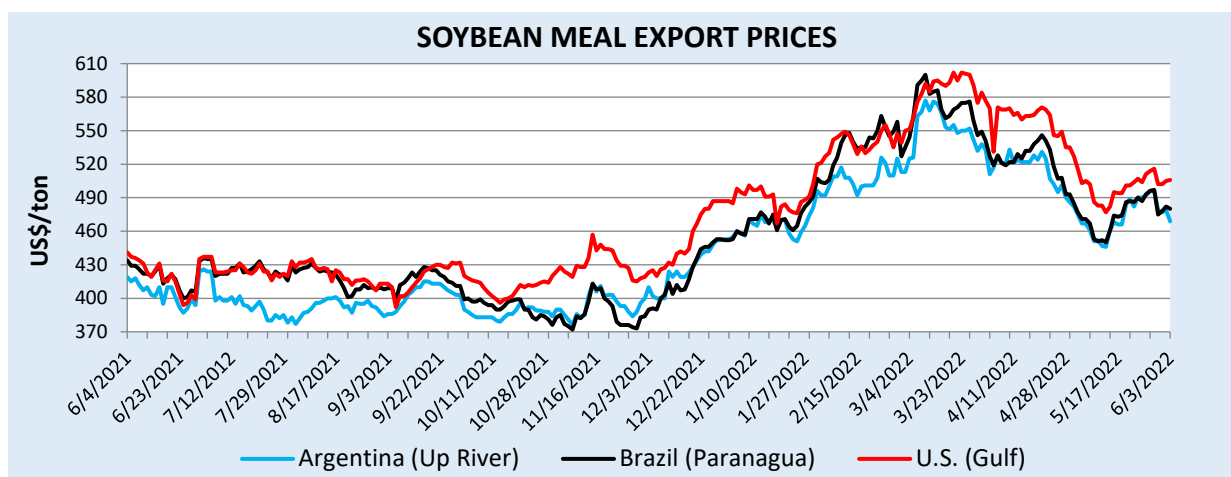

### May 2022 Soybean Meal Export Prices

	U.S.	Argentina	Brazil
<b>May Average Price</b>	<b>\$500/ton</b>	<b>\$473/ton</b>	<b>\$475/ton</b>
<b>Change vs. April</b>	<b>-\$59/ton</b>	<b>-\$43/ton</b>	<b>-\$48/ton</b>

Source: International Grains Council. All prices are FOB: U.S. Gulf, Argentina Up River, and Brazil Paranagua.

Monthly average soybean meal prices declined in May, continuing a trend of declining monthly prices since peaking in March on high oil prices driving crush and leading to discounted meal prices. However, after reaching a low in mid-month, prices recovered to end-of-April levels on rising demand spurred by the lower price. U.S. prices continue to run at a \$25/ton premium as rising South America crush increases exportable supplies.

### April 2022 Soybean and Palm Oil Export Prices

	U.S. Soybean Oil	Argentina Soybean Oil	Brazil Soybean Oil	Indonesia Palm Oil	Malaysia Palm Oil
<b>May Average Price</b>	<b>\$1,943/ton</b>	<b>\$1,810/ton</b>	<b>\$1,803/ton</b>	<b>\$1,771/ton</b>	<b>\$1,722/ton</b>
<b>Change vs. April</b>	<b>\$68/ton</b>	<b>-\$25/ton</b>	<b>-\$23/ton</b>	<b>\$24/ton</b>	<b>\$32/ton</b>

Source: International Grains Council; all prices are FOB: U.S. Gulf, Argentina Up River, Brazil Paranagua

Palm oil prices in May were higher, reflecting the uncertainty and confusion surrounding Indonesia's trade policies. In contrast, South America soybean oil prices were lower as rising crush increases export availability. The average U.S. soybean oil price was up as U.S. soybean oil continues to run at a premium to South America origin reflecting strong domestic demand.

### 2022/23 OUTLOOK CHANGES (All figures are in thousand metric tons)

Country	Commodity	Attribute	Previous	Current	Change	Reason
<b>Australia</b>	Oilseed, Rapeseed	Exports	3,700	<b>4,150</b>	<b>450</b>	Larger supplies
<b>Brazil</b>	Meal, Soybean	Exports	17,500	<b>17,700</b>	<b>200</b>	Larger supplies
<b>China</b>	Oil, Sunflowerseed	Imports	1,500	<b>1,100</b>	<b>-400</b>	Reduced availability from Ukraine
<b>European Union</b>	Oilseed, Rapeseed	Imports	5,300	<b>5,600</b>	<b>300</b>	Higher exports from Australia
<b>India</b>	Meal, Rapeseed	Exports	1,200	<b>1,000</b>	<b>-200</b>	Stronger domestic use
<b>Indonesia</b>	Oil, Palm Kernel	Exports	1,900	<b>1,750</b>	<b>-150</b>	Stronger domestic demand
<b>Ukraine</b>	Meal, Sunflowerseed	Exports	2,900	<b>2,700</b>	<b>-200</b>	Lower seed production forecast
	Oil, Sunflowerseed	Exports	3,800	<b>3,600</b>	<b>-200</b>	
	Oilseed, Soybean	Exports	1,000	<b>1,300</b>	<b>300</b>	Higher production

**2021/22 OUTLOOK CHANGES** (All figures are in thousand metric tons)

Country	Commodity	Attribute	Previous	Current	Change	Reason
<b>Argentina</b>	Meal, Soybean	Exports	28,000	<b>28,200</b>	<b>200</b>	Trade trend
	Oilseed, Soybean	Imports	2,200	<b>2,400</b>	<b>200</b>	
<b>Brazil</b>	Meal, Soybean	Exports	17,350	<b>18,000</b>	<b>650</b>	Higher crush and strong trade pace
	Oilseed, Soybean	Exports	82,750	<b>82,250</b>	<b>-500</b>	Slow trade pace
<b>Canada</b>	Oilseed, Rapeseed	Exports	5,300	<b>5,000</b>	<b>-300</b>	Trade trend
<b>China</b>	Meal, Rapeseed	Imports	1,800	<b>2,000</b>	<b>200</b>	Strong trade pace
	Oil, Palm	Imports	5,000	<b>4,500</b>	<b>-500</b>	Slow trade pace and weaker demand due to lockdowns
