

Oilseeds: World Markets and Trade

China Soybean Imports Lowered on Weaker Demand

China imports and consumption of oilseeds and vegetable oils have fallen short of expectations in recent months, and for that reason MY2021/22 soybean imports have been lowered 2.0 million tons to 90.0 million. So far, October-May soybean imports amounted to nearly 61.0 million tons, 5 percent lower compared to the same period a year ago. Additionally, major exporters' trade data indicates a further decline in October-July arrivals to nearly 76.0 million tons, 7.5 million tons (9 percent) lower than last year.

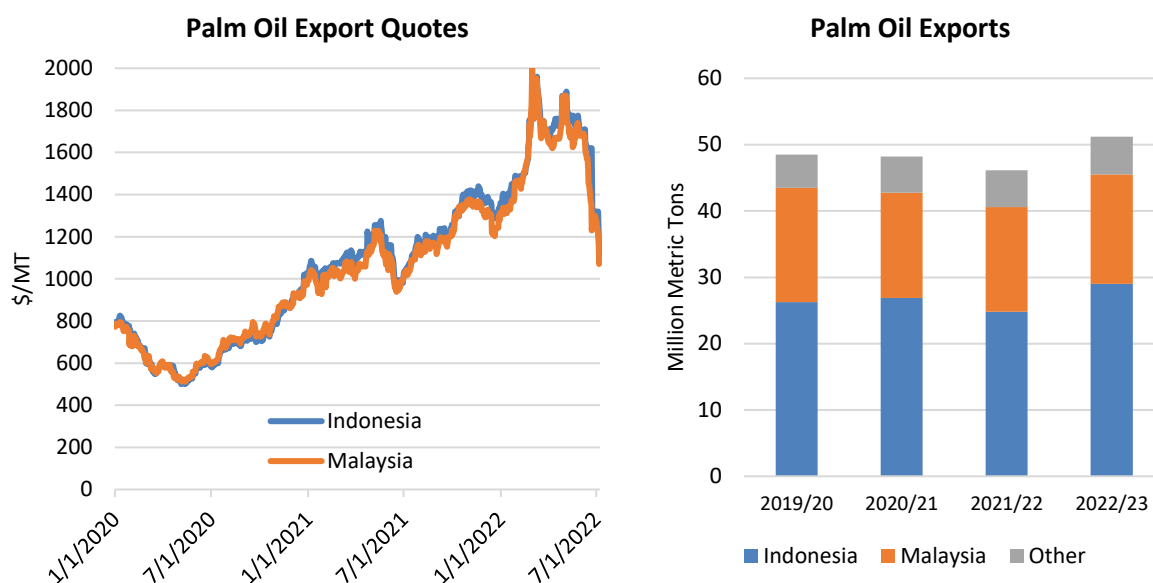

COVID-related restrictions in China, slowing economic growth, and higher global commodity prices have weakened China demand for oilseeds processing, protein meal, and vegetable oil consumption. For those reasons, the soybean crush forecast has been cut this month by 2.0 million tons to 87.0 million in line with a further decline in protein meal and food vegetable oil consumption growth in MY2021/22.

Similarly, MY2022/23 soybean imports have been lowered 1.0 million tons to 98.0 million on weak purchases to date and the assumption that recovery in demand for protein meals and vegetable oils will be more muted.

MARKET FEATURES

Palm Oil Trade Shrinks and Prices Remain Volatile Amid Changing Indonesian Policies

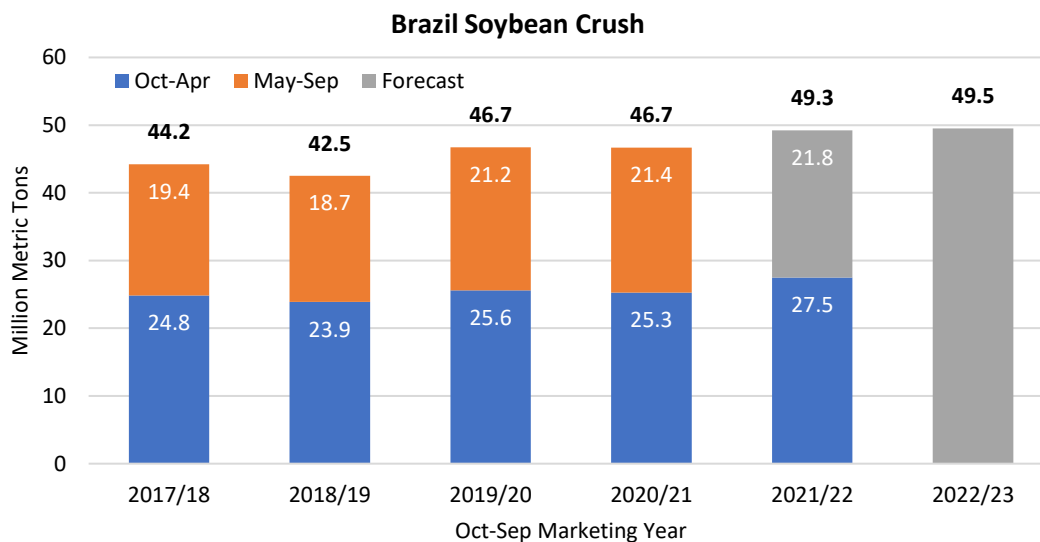

Indonesia's palm oil policies have had a profound impact on the global market this year, influencing availability and prices. The recent sharp decline in palm oil prices faced by importer countries reflects the repeal of the export ban and implementation of an export acceleration program. With reduced domestic market obligations and lower combined export taxes and levies, the country is making more palm oil available to the global market, sending prices to the lowest level in a year.

Over the past year, the vegetable oil market has been tight for several reasons – a poor rapeseed crop in Canada, more domestic use of soybean oil in the United States, and the war in Ukraine nearly halting all sunflowerseed oil from the historically top exporter. With less of these vegetable oils available, some importers shifted toward palm oil, which drove prices higher. Palm oil prices had already been rising based on labor shortages in Malaysia and strong biofuel use in both Malaysia and Indonesia.

Indonesia's ban on palm oil exports in April exacerbated these issues, as it accounts for more than half of global exports. The announcement sent importers scrambling for supplies and the domestic market searching for sufficient storage, causing domestic palm oil prices to plummet. In response, the Indonesian government replaced the export ban with a Domestic Market Obligation in May, allowing for exports as long as exporters supplied the domestic market first. In June, the government developed an Export Acceleration Program to reduce inventories and spur trade once again. However, the increase of the palm oil mandatory biodiesel blend from 30 percent to 35 percent in July may reduce the amount available for export.

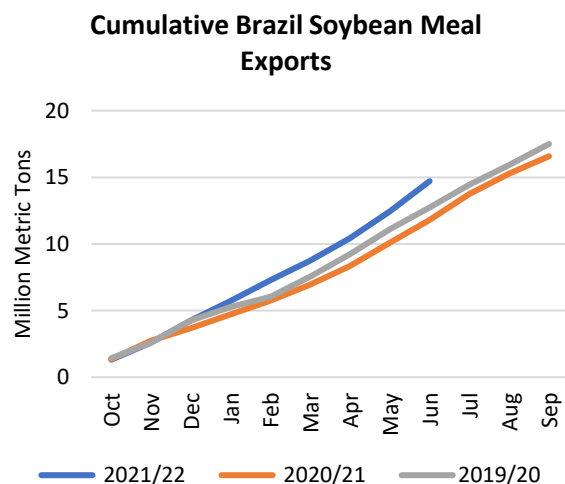

High prices throughout much of the 2021/22 marketing year (Oct/Sept) have driven a contraction in vegetable oil trade, with palm oil affected the most in terms of volume. The biggest reduction in imports has been from China, where vegetable imports overall have declined by half (see [June 2022 Oilseeds: World Markets and Trade](#), page 4). Demand for palm oil has diminished, with exports forecast at the lowest since 2015/16 as importers rely on domestic supplies and draw down their stocks. Even with the recent drop in prices, global trade in palm oil is not expected to rebound until 2022/23 since some buyers are waiting to see how low the price will drop before re-entering the market.

Record Brazil Soybean Crush and Strong Product Exports Despite Smaller Crop

Source: May 2022 ABIOVE Crush Data

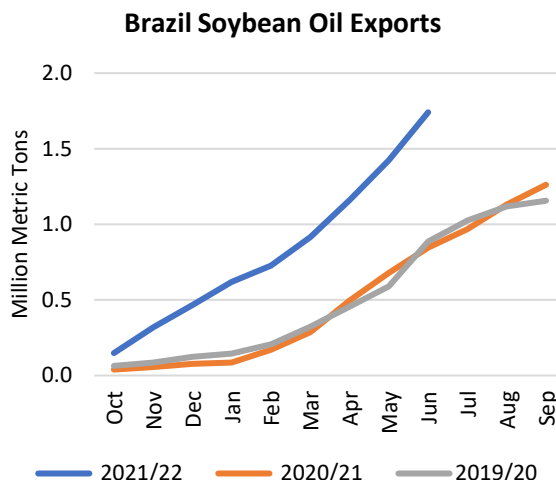

This month, 2021/22 Brazil soybean crush is up 750,000 tons to a record 49.3 million. Through the first 7 months of the marketing year (Oct/Sep basis), Brazil has crushed a record 27.5 million tons of soybeans. This equates to a 9-percent increase in crush over the same timeframe last year despite a crop that is 10 percent smaller than the previous year. Brazil soybean crush has continued to outpace last year's record despite significant headwinds from the smaller crop, higher soybean prices, and a lower-than-expected biodiesel blend rate for 2022. Instead, record high oil prices and elevated meal prices have driven Brazilian crush margins to record highs, fueling sustained growth. Additionally, slowing soybean import demand, mainly from China where Brazil typically supplies about two-thirds of bean imports, has led to reduced competition for soybeans for domestic crushers.

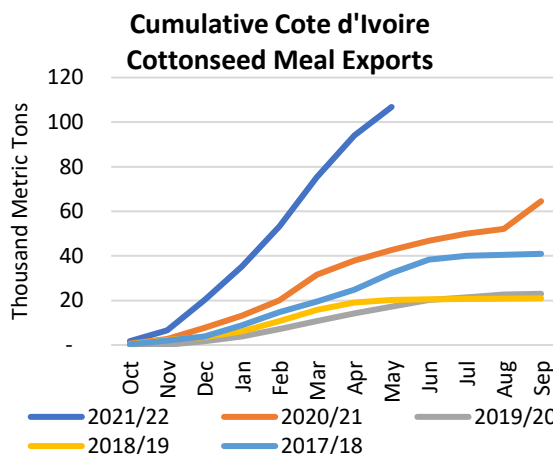

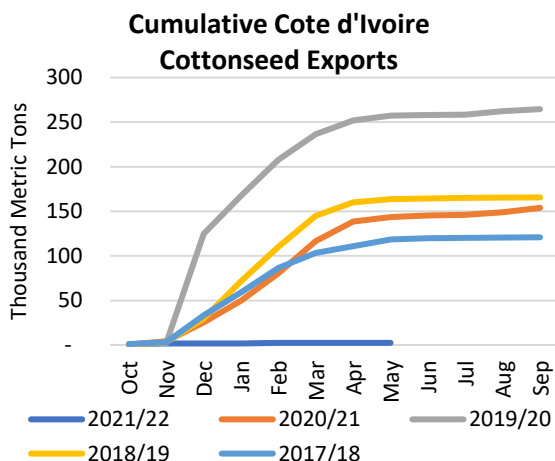

In Brazil, record crush has coincided with record soybean meal exports and decade-high soybean oil exports. For the fourth month in a row, both soybean meal and soybean oil export forecasts have been raised for Brazil. This month, soybean meal exports are up 500,000 tons to 18.5 million and soybean oil exports are up 100,000 tons to 2.1 million. Product exports have been boosted by greater exportable supplies on higher crush as well as reduced competition from other exporters. For meal, Brazil exports to the European Union, Vietnam, Indonesia, Bangladesh, and Japan are up a combined 2.6 million tons through the first 9 months of the marketing year (Oct-Jun). High premiums for U.S. and India soybean

meal have encouraged major importing countries to shift to lower-cost Brazilian soybean meal. Additionally, Brazil meal exports to Japan are up on lower exportable supplies from China this year.

For oil, record high palm oil prices, restrictive Indonesia trade policies, and the conflict in Ukraine have driven major vegetable oil importers, including India, to switch from palm and sunflowerseed oil to soybean oil. Additionally, Brazil has benefited from reduced competition from Argentina and higher premiums for U.S. soybean oil. Argentina soybean oil exports are down more than 25 percent through the first 8 months of the marketing year (Oct-May) on higher export taxes and subsidies to fight domestic inflation. Furthermore, the reduced competition from Argentina is likely to persist on tighter export supplies. The government recently announced a temporary jump in the biodiesel blend rate to combat tight diesel fuel supplies. In the United States, the rapid expansion of U.S. biodiesel production has led to a jump in domestic consumption and a high premium for U.S. soybean oil. This has allowed Brazil to absorb the lion's share of expanded global soybean oil demand and to offset lower Argentina exports.

Cote d'Ivoire Cottonseed Crush and Meal Exports Soar in 2021/22

Source: Cote d'Ivoire National Institute of Statistics

Over the past 3 years, Cote d'Ivoire has been the fifth largest producer of cottonseed in Africa, cultivating an average of 273,000 tons per year. In a typical year, the majority of production is exported to nearby countries including Mali and Burkina Faso, and only about a quarter or third of the crop is crushed domestically. However, through the first 8 months of 2021/22, Cote d'Ivoire has exported fewer than 3,000 tons, well below the previous 3-year average export total through May of just under 190,000. Conversely, cottonseed crush is up over 250 percent year-over-year. Similarly, higher cottonseed meal production has boosted meal exports, and Cote d'Ivoire is on pace to export more cottonseed meal this marketing year than the past 3 years combined. While cottonseed meal exports are still going to Mali and Burkina Faso, the majority are being shipped to Senegal and Mauritania. Cote d'Ivoire cottonseed oil exports are up too, but account for a small percentage of production. Instead, cottonseed oil is likely being consumed for food use to offset high vegetable oil prices and reduced palm oil consumption due to a record export pace.

PROJECTION FOR 2022/23

Global 2022/23 oilseed production is forecast down to 643 million tons as lower U.S. soybean production is only partially offset by higher Russia sunflowerseed production. Oilseed trade is down slightly on lower U.S. soybean exports partially offset by higher Brazil soybean exports. Crush is up marginally on higher Russia and EU sunflowerseed processing. Global ending stocks are down on lower U.S. and China soybean and Ukraine sunflowerseed carryout, partially offset by higher Argentina soybean stocks.

Global protein meal production is up slightly in line with crush. Meal exports and domestic consumption are up marginally predominantly on higher sunflowerseed trade and consumption. Meal ending stocks are down 1 percent on smaller sunflowerseed meal carryout. Global vegetable oil production is up slightly in line with crush. Trade is down fractionally on lower Malaysia palm oil exports. Domestic consumption is little changed overall as higher EU sunflowerseed oil consumption is offset by lower EU and Sub-Saharan Africa palm oil consumption. Ending stocks are up over 1 percent led by sunflowerseed and soybean oil gains. The projected U.S. season-average farm price for soybeans is down 30 cents to \$14.40 per bushel.

PROJECTION FOR 2021/22

Global 2021/22 oilseed production is up slightly at 600 million tons as higher China rapeseed and Argentina soybean crops are partially offset by lower global cottonseed production. Oilseed trade is nearly unchanged as lower South America soybean exports are mostly offset by higher global sunflowerseed and rapeseed trade. Crush is little changed overall as lower China soybean processing is mostly offset by higher South America soybean and China rapeseed crush. Ending stocks are up over 2 percent on higher South America soybean and EU rapeseed carryout.

Global protein meal production is little changed overall in line with offsetting changes to crush. Global meal trade is up marginally on higher Russia sunflowerseed exports. Meal consumption is down slightly led by lower China soybean meal consumption. Global ending stocks are up fractionally on higher soybean meal carryout partially offset by lower sunflowerseed meal stocks. Global vegetable oil production is down slightly on lower Malaysia palm oil production. Global vegetable oil trade is nearly unchanged this month as lower Argentina soybean oil and Malaysia palm oil exports are mostly offset by higher sunflowerseed oil trade. Global vegetable oil consumption is down fractionally on lower palm oil food use, while ending stocks are up slightly on higher EU rapeseed carryout. The projected U.S. season-average farm price for soybeans is unchanged at \$13.35 per bushel.

EXPORT PRICES

June 2022 Soybean Export Prices

	U.S.	Argentina	Brazil
June Average Price	\$670/ton	\$648/ton	\$661/ton
Change vs. May	+ \$3/ton	\$0/ton	- \$4/ton

Source: International Grains Council. All prices are FOB: U.S. Gulf, Argentina Up River, and Brazil Paranagua.

Monthly average soybean prices moved marginally in June with the U.S. price slightly higher, the Brazilian price lower, and no change in the Argentine price. However, after peaking in the first half of the month, prices drifted lower, especially in the final days of the month into early July. This puts early July prices roughly \$50/ton below

mid-June levels with U.S. prices remaining at a premium to South American. These declines mirror recent losses in corn, wheat, and other commodities.

June 2022 Soybean Meal Export Prices

	U.S.	Argentina	Brazil
June Average Price	\$527/ton	\$476/ton	\$483/ton
Change vs. May	+\$27/ton	+\$3/ton	+\$7/ton

Source: International Grains Council. All prices are FOB: U.S. Gulf, Argentina Up River, and Brazil Paranagua.

Monthly average soybean meal prices rose in June with premiums increasing for U.S. soybean meal vis-à-vis South American. Strong domestic demand for U.S. soybean meal is likely behind the rising premiums relative to South American, currently near \$70/ton. This is up from an average of \$25/ton in early June. Declining soybean oil prices are putting pressure on meal prices to make up the difference and maintain crush margins.

June 2022 Soybean and Palm Oil Export Prices

	U.S. Soybean Oil	Argentina Soybean Oil	Brazil Soybean Oil	Indonesia Palm Oil	Malaysia Palm Oil
June Average Price	\$1,850/ton	\$1,596/ton	\$1,621/ton	\$1,565/ton	\$1,479/ton
Change vs. May	-\$93/ton	-\$214/ton	-\$182/ton	-\$206/ton	-\$247/ton

Source: International Grains Council; all prices are FOB: U.S. Gulf, Argentina Up River, Brazil Paranagua

Vegetable oil prices fell precipitously in June, underpinned by slack demand due to high prices. Increasing exportable supplies of palm oil in Indonesia also contributed to falling vegetable oil prices. Vegetable oil prices in early July continued to fall with palm oil roughly down a third from early June and South American soybean oil down nearly 20 percent. The discount for palm oil vis-à-vis soybean oil widened further in early July. U.S. soybean oil prices also declined in June but at a slower pace relative to South American origin as domestic vegetable oil supplies remain tight and as demand for biodiesel feedstocks continues to provide support.

2022/23 OUTLOOK CHANGES (All figures are in thousand metric tons)

Country	Commodity	Attribute	Previous	Current	Change	Reason
Brazil	Meal, Soybean	Exports	17,700	18,100	400	Higher crush
	Oilseed, Soybean	Exports	88,500	89,000	500	Larger exportable supplies on higher carryin
Canada	Oilseed, Soybean	Exports	4,450	4,300	-150	Smaller crop
China	Oilseed, Soybean	Imports	99,000	98,000	-1,000	Slower demand recovery given slow 2021/22 imports
European Union	Oil, Palm	Imports	6,200	6,000	-200	Lower demand for laurics on higher sunflowerseed oil production
India	Meal, Soybean	Exports	1,900	1,600	-300	Reduced competitiveness
Malaysia	Oil, Palm	Exports	16,720	16,500	-220	Reduced demand from EU
Russia	Meal, Sunflowerseed	Exports	1,700	2,000	300	Greater exportable supplies and higher crush
South Africa	Meal, Soybean	Imports	450	300	-150	Slower consumption growth at high prices
United States	Meal, Soybean	Exports	13,063	12,701	-362	Smaller exportable supplies
	Oilseed, Soybean	Exports	59,874	58,105	-1,769	on lower production

2021/22 OUTLOOK CHANGES (All figures are in thousand metric tons)

Country	Commodity	Attribute	Previous	Current	Change	Reason
Argentina	Oil, Soybean	Exports	5,530	5,350	-180	Slow export pace
	Oilseed, Soybean	Exports	2,750	2,250	-500	
	Oilseed, Soybean	Imports	2,400	2,900	500	
Australia	Oilseed, Rapeseed	Exports	4,800	5,000	200	Strong EU demand
Brazil	Meal, Soybean	Exports	18,000	18,500	500	Higher crush and strong export pace
	Oilseed, Soybean	Exports	82,250	81,000	-1,250	Slow export pace
China	Oil, Sunflowerseed	Imports	1,000	800	-200	Pace of trade to date
	Oilseed, Soybean	Imports	92,000	90,000	-2,000	Trade pace and weaker processing demand
European Union	Oil, Rapeseed	Exports	500	321	-179	Trade data
	Oilseed, Sunflowerseed	Exports	575	375	-200	Pace of trade to date
	Meal, Sunflowerseed	Imports	2,325	2,555	230	Pace of trade to date
	Oil, Sunflowerseed	Imports	1,600	1,900	300	Pace of trade to date
	Oilseed, Rapeseed	Imports	5,000	5,519	519	Trade data
India	Oilseed, Sunflowerseed	Imports	1,100	1,700	600	Pace of trade to date, mainly from Ukraine
	Meal, Soybean	Exports	2,100	1,400	-700	Uncompetitive price
	Oil, Palm	Imports	7,800	8,300	500	Lower prices
Iran	Oil, Sunflowerseed	Imports	1,900	1,500	-400	Reduced purchases from Black Sea
	Meal, Soybean	Imports	1,750	1,500	-250	Pace of trade to date
Kazakhstan	Oilseed, Soybean	Imports	1,825	2,025	200	Pace of trade to date
	Oilseed, Sunflowerseed	Imports	120	270	150	Pace of trade to date
Malaysia	Oil, Palm	Exports	16,120	15,800	-320	Lower production
Mexico	Oilseed, Soybean	Imports	6,200	6,000	-200	Slow import pace
Nigeria	Oil, Palm	Imports	450	300	-150	Slow import pace
Russia	Meal, Sunflowerseed	Exports	1,750	2,050	300	Importers' trade pace
South Africa	Meal, Soybean	Imports	480	300	-180	Slow import pace
Thailand	Meal, Soybean	Imports	2,900	3,100	200	Pace of trade to date
	Oilseed, Soybean	Imports	3,900	3,600	-300	Reduced crush
Turkey	Meal, Soybean	Imports	1,050	1,250	200	Pace of trade to date
	Oil, Sunflowerseed	Imports	1,000	1,200	200	Pace of trade to date
	Oilseed, Sunflowerseed	Imports	800	600	-200	Pace of trade to date
Ukraine	Oilseed, Sunflowerseed	Exports	1,000	1,600	600	Pace of trade to date, mainly to the EU
United Kingdom	Meal, Soybean	Imports	2,200	2,000	-200	Pace of trade to date
	Oilseed, Soybean	Imports	650	950	300	
United States	Meal, Soybean	Exports	12,701	12,428	-273	Strong domestic demand
