

# Cotton: World Markets and Trade

## 2022/23 Global Consumption Projected Down Again

Global cotton consumption is projected down 3.3 million bales this month to 111.7 million. Declining supplies, lower profit margins for spinning mills, falling yarn orders from fabric and apparel companies, and higher inflation levels are all pressuring consumption.

Significant challenges for the three largest consumers – China, India, and Pakistan – are expected to lower global consumption significantly below the previous 2 years. India's consumption is projected down 1.0 million bales this month to 23.0 million, falling more than 2.0 million from the previous year and the largest year-over-year decline for all cotton consumers. Significantly lower beginning stocks, falling exports of textiles (yarn and fabric) and cotton products, and less competitive yarn export prices are pressuring consumption prospects. Higher spot prices for cotton relative to other major spinners have eroded India's stature as a competitive yarn exporter to China. See last month's edition titled [China's Sluggish Yarn Imports Signal Slowing Global Cotton Consumption](#) for more information.

China's consumption is also projected down 1.0 million bales this month to 35.5 million, marginally above the previous year but more than 5.0 million below 2 years prior. As the world's largest cotton

consumer and importer of cotton yarn, China's supply and use situation is normally indicative of the overall direction and vitality of the global cotton supply chain.

Ongoing COVID-19 lockdowns, slowing domestic purchases of apparel, declining yarn prices relative to cotton lint, and significantly lower cotton product exports have drastically slowed China's consumption over the past 2 years. The United States, the world's largest importer of cotton products, showed lower imports of products from China by more than 40 percent during the first 3 months of the marketing year (August – October 2022).

Pakistan's consumption is estimated at its lowest level in over 20 years, forecast down 700,000 bales this month to 9.0 million, dropping nearly 2.0 million from the previous year mostly because of lower supplies. Pakistan's production is projected at the lowest level in nearly 40 years at 3.7 million bales. Although imports are projected above the previous year at 5.0 million bales, mills in Pakistan have had issues with the stronger U.S. dollar, opening Letters of Credit, and finalizing older contracts which were negotiated at significantly higher prices earlier this year.

Global cotton consumption is now projected at its second-lowest level in nearly a decade. If realized, this would reduce annual cotton use by nearly 6.0 million bales below the previous year and more than 11.4 million below 2 years prior.

## 2022/23 Outlook

Global production is down 700,000 bales from the previous month to 115.7 million, largely owing to lower production in Pakistan. This is the fourth consecutive month that Pakistan production has fallen and is supported by weak arrivals data. Global stocks are forecast up with consumption projected down more than 3.0 million bales. This is the seventh consecutive monthly decline for global consumption. Global trade is down roughly 1.0 million bales, led by a decline in China, and is now forecast lower compared with the previous year.

The U.S. balance sheet shows higher production and ending stocks relative to the previous month. Exports and consumption are forecast down this month, and shipments are projected at the lowest level in 7 years. The projected U.S. season-average farm price is unchanged at 85 cents per pound.

## Global Cotton Prices

Notes: **A-Index** is the average of the five cheapest quotations (quality being Middling 1<sup>1/8</sup>) for Cost and Freight (CFR) at a Far Eastern Port (more information [here](#)); **U.S.** is the simple average of spot quotations reported by the Agricultural Marketing Service (more information [here](#)); **China** is the reported China Cotton Price Index (i.e. CCIndex 3128B) and reflects the national weighted average of cotton (3128B grade) delivered to more than 200 enterprises in China; **India** is the Shankar-6 (grade 29-3.8-76) spot price reported [here](#); **Brazil** is the delivered price in São Paulo city (grade strict low middling).

**Changes Since November WASDE (cents per pound)**

	<b>A-Index</b>	<b>U.S.</b>	<b>China</b>	<b>India</b>	<b>Brazil</b>
7-Nov	104.1	87.3	96.8	102.2	98.0
7-Dec	102.8	80.8	96.8	103.2	101.5
<b>Change</b>	<b>-1.3</b>	<b>-6.5</b>	<b>0.1</b>	<b>1.0</b>	<b>3.5</b>

Global cotton prices were mostly unchanged since last month's *WASDE* outside the United States. Lower prices on the Intercontinental Exchange (ICE) pressured U.S. spot prices owing partly to extremely low reported USDA export sales. For the last four USDA reports, the total sum of net sales did not exceed 30,000 bales and this is contrary to seasonal trends.
