

Oilseeds: World Markets and Trade

U.S. Soybean Oil Exports Forecast at Record Low

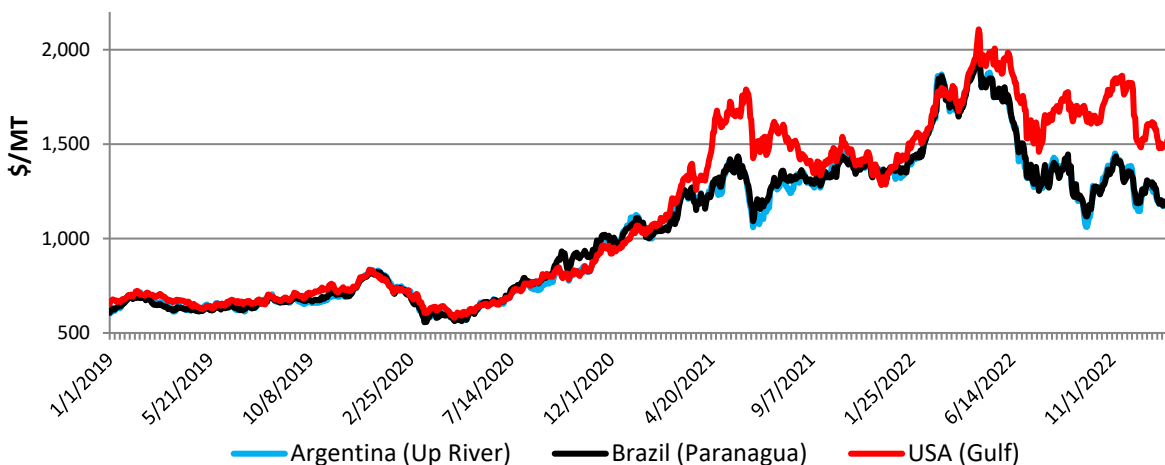

Continuing a multi-year downward trend, U.S. soybean oil exports for MY 2022/23 are forecast at a record low of 318,000 tons. Domestic soybean production has risen over the past decade, supporting larger crush and soybean oil production which are both projected to reach record levels this year. However, strong U.S. domestic demand for soybean oil and high prices have diverted supplies away from the export market.

U.S. Soybean Oil Domestic Consumption and Exports

Historically, U.S. soybean oil exports were driven largely by the level of production and tracked closely with global trends. However, in recent years, the U.S. soybean oil market has experienced a redistribution among use categories. Strong federal and state policies have supported the increased use of soybean oil as a feedstock for biofuel production. The share of U.S. soybean oil production used for domestic industrial consumption is expected to reach 44 percent in MY 2022/23, compared to 25 percent a decade ago.

Soybean Oil Export Prices

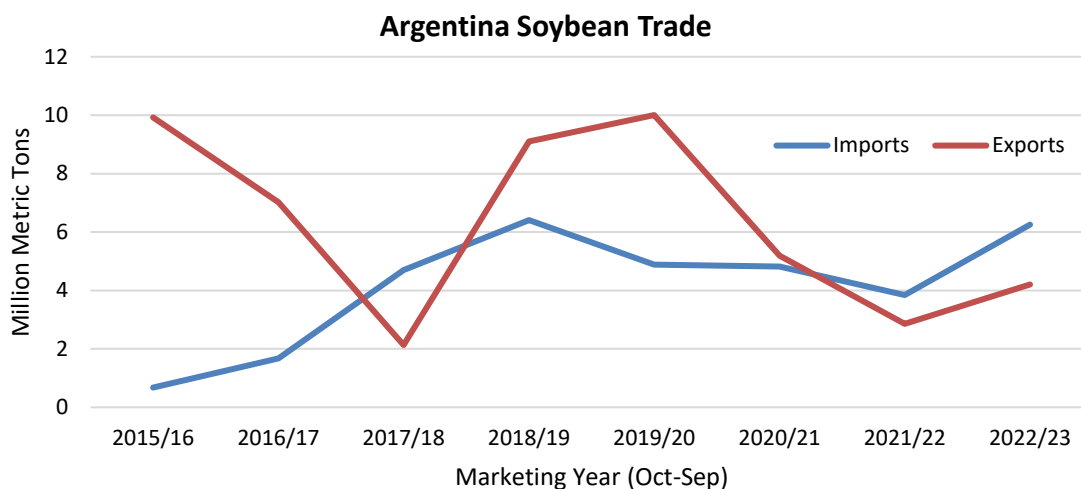

Strong domestic demand has extended the premium for U.S. soybean oil compared to South American exporters, reducing its competitiveness on the global market. U.S. soybean oil prices have come down since reaching record highs in MY 2021/22, but the spread against Argentina and Brazil remains

prohibitive to the export market. Looking forward, 2022/23 soybean oil prices are likely to continue to be buoyed by increasing biofuel production in both the United States and South America, as well as expected lower soybean production and crush in Argentina.

MARKET FEATURES

Argentina Soybean Exports Down and Imports Up on Shrinking Production

For the second consecutive month, Argentina soybean production has been cut due to drought and high temperatures in key growing regions. As a result, production and total supply are forecast at 5-year lows. Tighter supplies are expected to pressure both exports and crush downward.

In addition to falling production, exporters and crushers are likely to face additional challenges procuring soybeans due to slow farmer selling. Farmers are likely to hold onto 2022/23 soybeans, selling only out of necessity to pay bills and buy inputs, to hedge against inflation and uncertainties surrounding exchange rates and the October 2023 general election.

As a result, exports are lowered 1.5 million tons this month. While 2022/23 exports are forecast up year over year, 3.0 million tons have already shipped during the first 2 months (Oct-Nov) due to the ‘soy dollar’ exchange rate policy that temporarily boosted farmer selling and exports. Thus, exports during the final 10 months of the marketing year (Dec-Sep) are forecast at 1.2 million tons, which if realized, would be the lowest December-September total in nearly 3 decades.

Similarly, soybean crush is down 700,000 tons this month to 37.3 million (Oct-Sep) on tighter supplies. However, crushers are expected to partially offset lower domestic supplies by importing more soybeans from Brazil and Paraguay. This month, imports are raised to 6.3 million tons, the second-highest level of Argentina soybean imports in the USDA database.

The Re-Emergence of Palm Oil as the Global Discount Oil

Palm oil and soybean oil prices have historically tracked closely as they are considered substitute oils. The graph below shows how prices of U.S. and Argentina soybean oil and Malaysia and Indonesia palm oil have compared over recent years and how palm oil has reemerged as the global discount oil, especially compared to U.S. soybean oil.

Source: IGC

The war in Ukraine impacted global vegetable oil prices due to the significant presence of both Ukraine and Russia in the vegetable oil market. Palm and soybean oil both rose to levels exceeding \$1,800/ton after the Russian invasion in early March 2022. By the following month, soybean oil was trading at a premium to palm oil driven by a shortage of sunflowerseed oil in global markets and renewed demand for biodiesel feedstock in the United States. The demand for biodiesel feedstock put U.S. soybean oil at a premium against other soybean oils and especially against palm oil.

Government policies in Indonesia, the world's largest palm oil exporter, have also contributed to palm's substantial discount. Indonesia first implemented export-restricting measures in January 2022 which included export levies and domestic market obligations. These turned into an outright ban on exports in April which led to palm oil briefly surpassing soybean oil in price by the following month. This increase happened despite the weakening of the Malaysia ringgit against the U.S. dollar in April. By the end of May, Indonesia had reversed most of its palm oil export restrictions leading to a sharp decline in palm oil prices and increasing discount against soybean oil as Indonesia shipped off its now substantial stocks. Additionally, the Malaysian ringgit continued to depreciate until November when the palm to soybean oil discount reached a high of \$491/ton. Since then, the ringgit has strengthened to more typical exchange levels and Indonesia has reimposed export levies. This contributed to a falling discount between palm oil and South American soybean oil to around \$200/ton by the end of January, still higher than typical.

Looking ahead, the current discount level between palm and soybean oil will likely be sustained with reduced Argentina soybean production and strong U.S. biodiesel demand outweighing the impact of Indonesia palm oil policy. A higher amount of sunflowerseed oil reaching global markets will also act as a downward force on palm oil prices as it competes for market share in places like India. On the other

hand, Indonesia recently implemented a higher biofuel blending mandate (B35) and its impact on global markets is yet to be realized. However, it could lead to reduced exportable palm oil supplies, rising prices, and a reduced discount compared to soybean oil.

Soybean Meal Trade Revisions for India and Bangladesh

The primary USDA source for India trade data is the Ministry of Commerce and Industry of India. However, due to underreported trade with Bangladesh likely via land trade routes, soybean meal export totals in India have been revised in MY 2019/2020 and 2020/2021. Based on data reported in the Bangladesh Bureau of Statistics Yearbook of Agricultural Statistics, USDA has revised trade estimates for both India and Bangladesh to account for underreported soybean meal trade.

Country	Commodity	Marketing Year	Attribute	Previous	Current	Change
India	Meal, Soybean	2019/2020	Exports	886	1,166	280
		2020/2021		2,025	2,395	370
		2021/2022		660	940	280
Bangladesh	Meal, Soybean	2019/2020	Imports	229	509	280
		2020/2021		410	780	370
		2021/2022		411	691	280

OVERVIEW 2022/23

Global oilseed production is lowered nearly 6 million tons, primarily on a reduced soybean outlook in Argentina and Ukraine and reduced Russia sunflowerseed. Trade is revised upwards with lower exports of soybeans outweighed by higher rapeseed exports from Canada and Australia. Total meal production is lowered on reduced soybean crush with trade falling due to soybean meal, largely due to the reduced crop in Argentina. Global meal stocks are lowered on soybean meal. Total oil production is largely unchanged with trade rising on higher sunflowerseed oil exports. The projected U.S. season-average farm price for soybeans is up 10 cents to \$14.30/bu.

EXPORT PRICES

Soybean export prices in January were largely unchanged on average compared to December, though the market was not without movements. Concerns over South America weather conditions provided some price support for soybeans, while crude oil losses and uncertainty over China demand were bearish influences in January.

For the second month in a row, soybean meal prices continued to climb while soybean oil prices fell for all major exporters. This continues a trend of soybean meal regaining a larger share of the soybean value amidst ample global supplies of other vegetable oils and lower-than-expected biofuel targets in the United States.

Soybean oil export prices continued a downward course, finishing about \$60/ton lower on average in January than in December. Palm oil prices were roughly unchanged, slightly narrowing the premium between the two oils.

January 2023 Soybean Export Prices

	U.S. Gulf FOB	Argentina Up River FOB	Brazil Paranagua FOB
January Avg. Price	\$607/ton	\$616/ton	\$590/ton
Change vs. December	+\$6/ton	\$0/ton	+\$1/ton

2022/23 OUTLOOK CHANGES (All figures are in thousand metric tons)

Country	Commodity	Attribute	Previous	Current	Change	Reason
Argentina	Meal, Soybean	Exports	26,500	26,200	-300	Lower exportable supplies on smaller production and crush
	Oil, Soybean	Exports	5,250	5,100	-150	
	Oilseed, Soybean	Exports	5,700	4,200	-1,500	
	Oilseed, Soybean	Imports	5,000	6,250	1,250	Higher imports to partially offset smaller crop
Australia	Oilseed, Rapeseed	Exports	5,400	5,700	300	Large exportable supplies and strong EU demand
Brazil	Meal, Soybean	Exports	20,700	21,000	300	Larger exportable supplies on higher crush
	Oilseed, Soybean	Exports	91,000	92,000	1,000	Higher Argentina import demand and lower Argentina export competition
Canada	Oilseed, Rapeseed	Exports	7,900	8,400	500	Large exportable supplies and strong demand from China
	Meal, Soybean	Exports	600	400	-200	Sluggish exports in Q1
China	Meal, Sunflowerseed	Imports	2,000	2,500	500	Strong pace of trade in Q1, mainly from Ukraine, offsetting reduced soybean crush
	Oilseed, Rapeseed	Imports	2,500	3,200	700	Strong pace of trade in Q1, mainly from Canada, offsetting reduced soybean crush
European Union	Oil, Palm	Imports	5,500	5,300	-200	Higher availability of other oils
	Oilseed, Rapeseed	Imports	5,700	5,975	275	Attractive price and high availability
	Oilseed, Soybean	Imports	14,400	13,900	-500	Trade pace
India	Oil, Palm	Imports	8,730	9,030	300	Higher stocking on attractive palm oil prices
	Oil, Sunflowerseed	Imports	1,800	2,050	250	Higher import pace
Malaysia	Oil, Palm	Exports	16,500	16,700	200	Higher production outlook
Pakistan	Oilseed, Soybean	Imports	2,500	1,500	-1,000	Defacto GE import ban due to no import permits
Pakistan	Oilseed, Rapeseed	Imports	950	850	-100	

Paraguay	Meal, Soybean	Exports	2,150	2,000	-150	Smaller exportable supplies on lower crush
	Oilseed, Soybean	Exports	5,800	6,300	500	Higher exports to Argentina
Russia	Oil, Sunflowerseed	Exports	3,700	3,850	150	Increased crush
Turkey	Oil, Sunflowerseed	Exports	750	975	225	Refining and re-exporting
	Oil, Sunflowerseed	Imports	800	1,050	250	
Ukraine	Meal, Sunflowerseed	Exports	2,900	3,200	300	Increased exports to China
	Oil, Sunflowerseed	Exports	3,650	3,850	200	Increased crush and strong global demand for oil
	Oilseed, Sunflowerseed	Exports	2,450	2,650	200	Higher production
Uruguay	Oilseed, Rapeseed	Exports	300	475	175	Greater exportable supplies on higher production
